Justification for Re-use of Radio Test Results

We, ABMRC LLC, believe that the conducted signal test data on original reports provided by the Texas Instruments Incorporated (Wi-Fi and Bluetooth Module, FCC ID: Z64-WL18SBMOD AND IC: 451I-WL18SBMOD) can be re-used for the following reasons:

1. Applicant has built in radio module according to the specific radio module integration guides.
2. No changes have been made on radio module.
3. Re-tested the conducted power for spot check verification, the radiated spurious emission and co-located emission, and re-evaluated the RF Exposure.

On and for Behalf of ABMRC LLC, 860 Blue Gentian Road Suite 200, Eagan, MN, 55121-1567, USA.
