

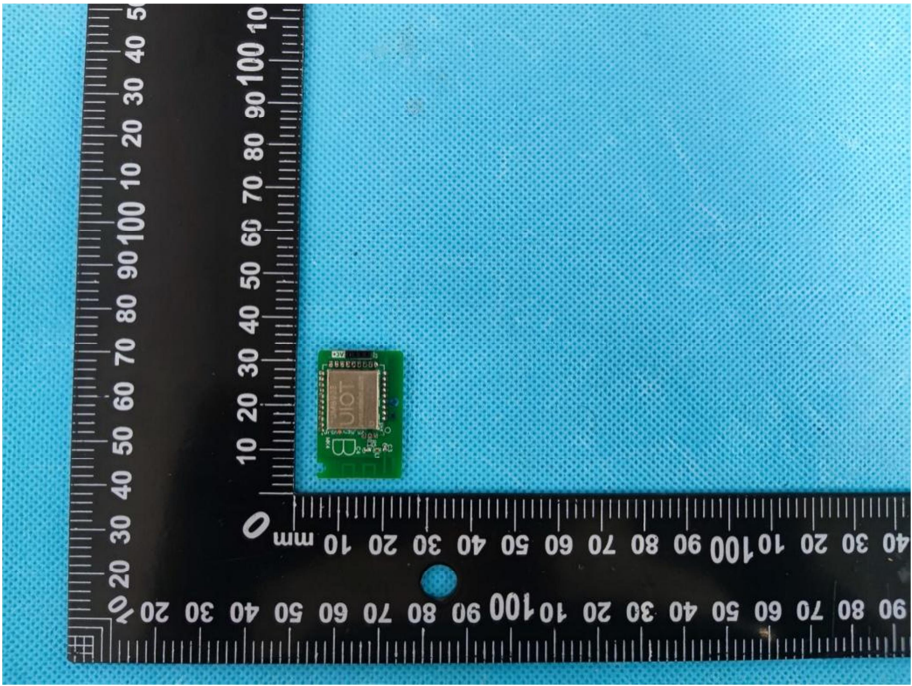

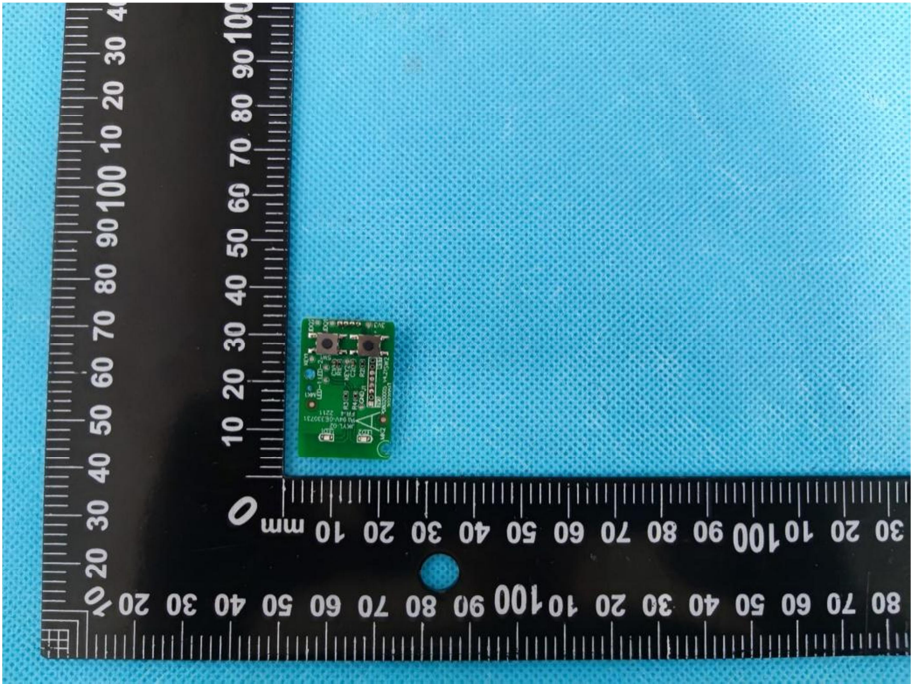

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

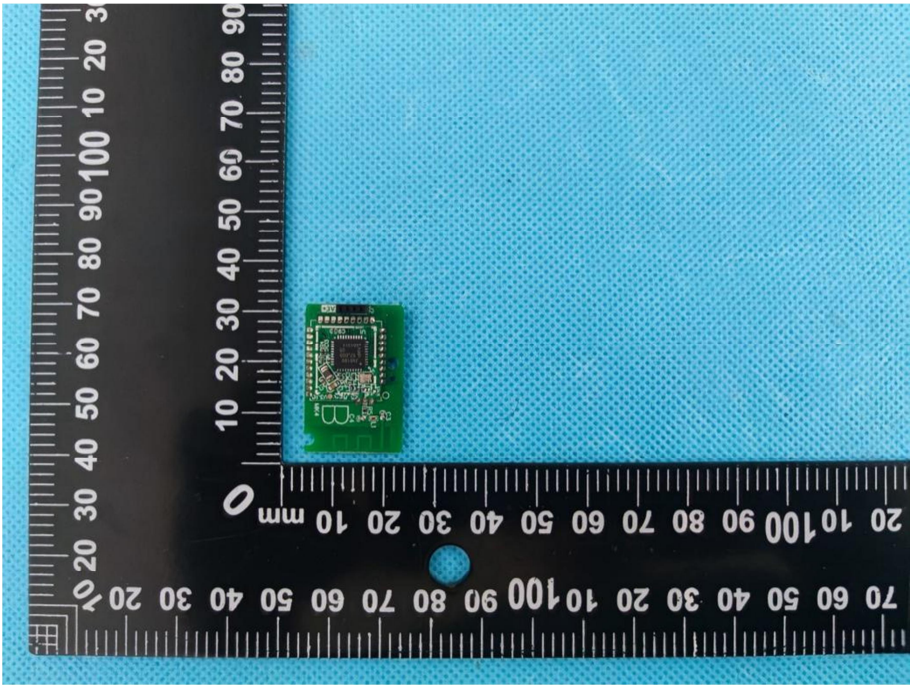

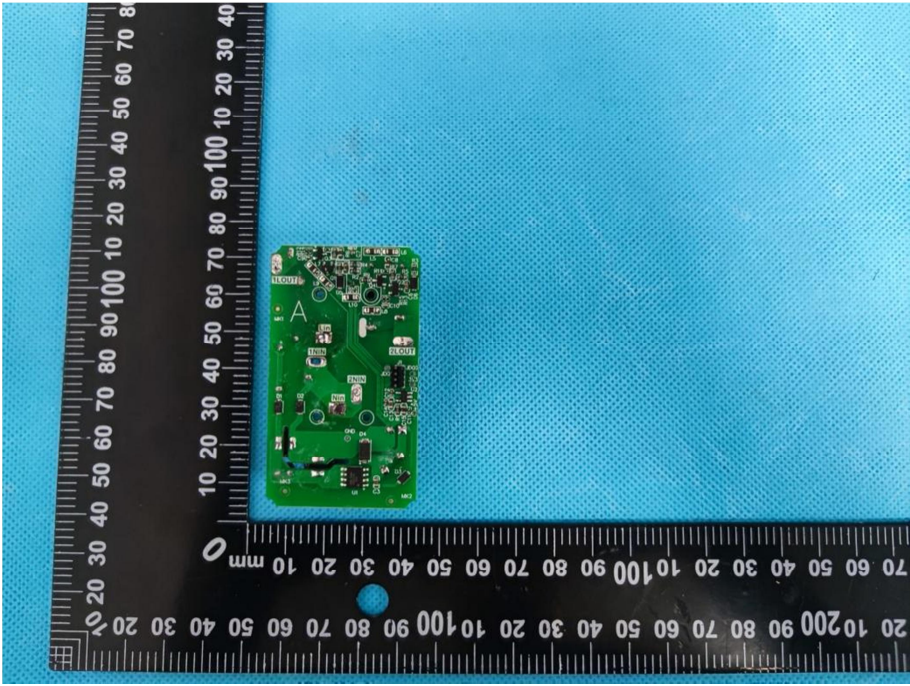

EUT Housing and Board View 1

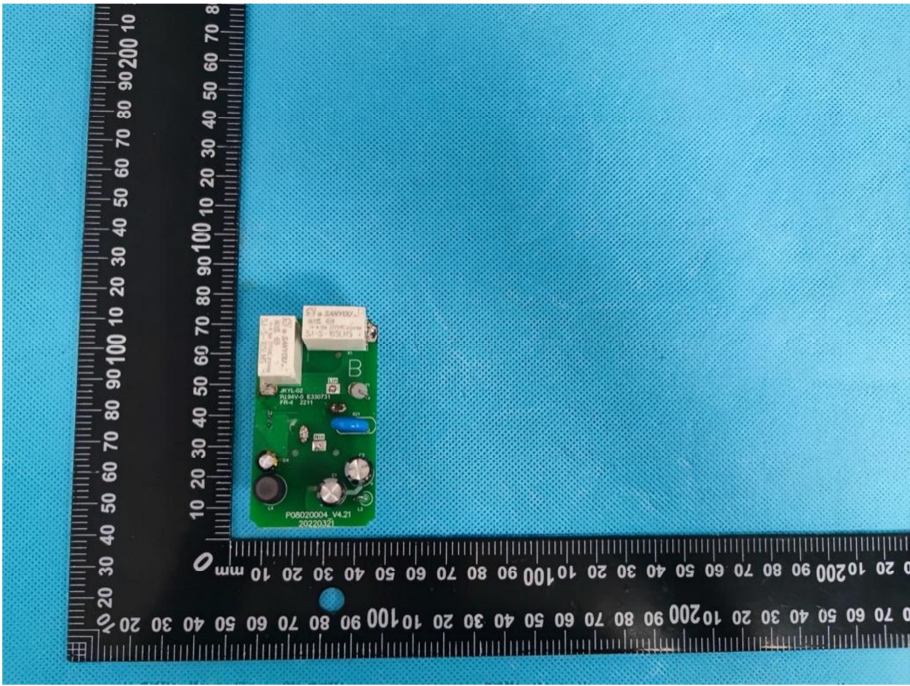

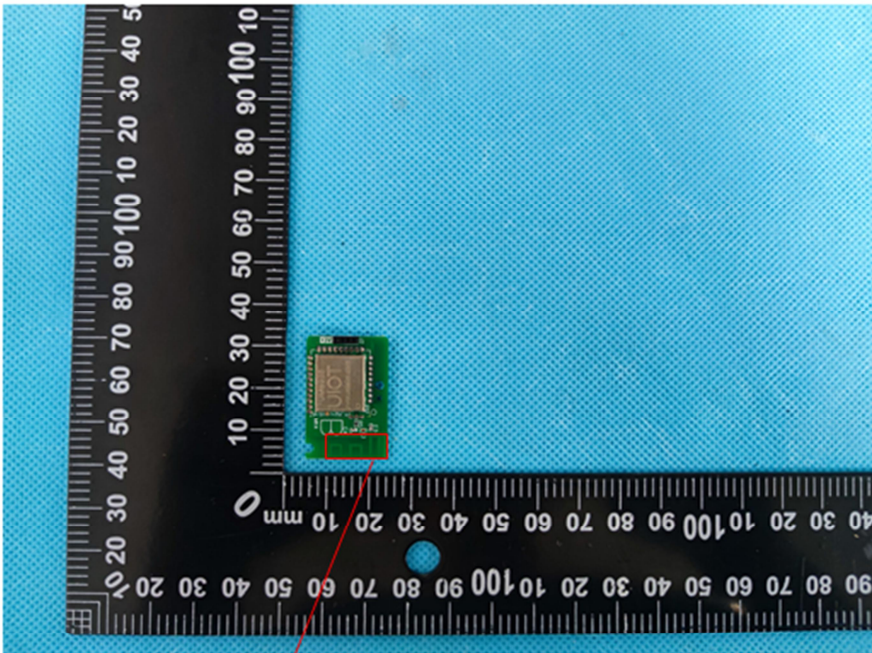

EUT Housing and Board View 2

<p>Solder Board-Component View 1</p>	 <p>A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is rectangular and has a gold-colored pad on its top surface. A black L-shaped ruler is placed next to the component for scale, with markings in millimeters. The ruler shows the component is approximately 10 mm wide and 10 mm high.</p>
<p>Solder Board-Component View 2</p>	 <p>A photograph showing the same green PCB component from a different angle. This view shows the underside of the component, revealing various components and traces. A black L-shaped ruler is placed next to it for scale, showing the component is approximately 10 mm wide and 10 mm high.</p>

<p>Solder Board-Component View 3</p>	 <p>A photograph showing a small green printed circuit board (PCB) component, likely a microcontroller or sensor, mounted on a larger green PCB. The component is positioned on a blue textured surface. A black ruler with white markings is placed to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is approximately 10 mm wide and 10 mm high.</p>
<p>Solder Board-Component View 4</p>	 <p>A photograph showing the same green PCB component from a different perspective. The component is mounted on a larger green PCB. A black ruler with white markings is placed to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is approximately 10 mm wide and 10 mm high.</p>

<p>Solder Board-Component View 5</p>	 <p>A photograph of a green printed circuit board (PCB) component, likely a Zigbee module, mounted on a blue textured surface. The component is rectangular and features several components, including a large silver component, a blue capacitor, and various surface-mount components. A black L-shaped ruler is placed next to the component for scale, with markings in millimeters. The ruler shows the component is approximately 100mm wide and 40mm high.</p>
<p>Antenna View</p>	 <p>A close-up photograph of the Zigbee module component, showing the antenna area. The component is mounted on a blue textured surface. A black L-shaped ruler is placed next to it for scale. A red box highlights the antenna area, and a red line points from the text 'zigbee Antenna' in a white box below the image to this area. The antenna area is a small, rectangular section of the PCB.</p> <p>zigbee Antenna</p>
