## Declarations

## U.S. Radio Frequency FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### ISED RSS Warning:

This device complies with Innovation, Science and Economic Development Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. Le présent appareil est conforme aux CNR d'ISED applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement

Iroubleshooting					
Issues	Possible Causes	Solution			
The motor has no response	Battery in motor is depleted	Recharge with compatible AC adaptor and check connection and positioning of solar PV panel			
	Insufficient charging from Solar PV Panel	Check connection and orientation of solar PV panel			
	Remote control battery is discharged	Replace battery			
	Battery is inserted incorrectly into remote control	Check battery polarity			
	Radio interference / shielding	Ensure remote control is positioned away from metal objects and the aerial on motor receiver is kept straight away from metal			
	Receiver distance is too far from Remote Control	Move remote control to a closer position			
	Power failure	Check power supply to motor is connected and active			
	Incorrect wiring	Check that wiring is connected correctly (refer to motor installation instructions)			
Motor beeps 10 times when in use	Battery voltage is low / PV (solar panel issue)	Recharge with AC adaptor or check connection and positioning of solar PV panel			
annot program a single motor nultiple motors respond)	Multiple motors are paired to the same channel.	Always reserve an individual channel for programming functions			
		SYSTEM BEST PRACTICE - Provide an extra 15 channel remote in your multi-motor projects that provides individual control for each motor for programming purposes			
		Place all other motors into sleep mode (ref to <b>P1</b> button instructions)			

## Fields of Application

## Specifications

3V (CR2450)

433.92 MHz Bi-directional Radio Frequency

**Transmitting Power** 10 milliwatt

Operating Temperature 14°F to 122°F (-10°C to 50°C)

**RF Modulation** FSK Yes Lock Function **IP Rating** 

**Transmission Distance** up to 200m (outdoor)

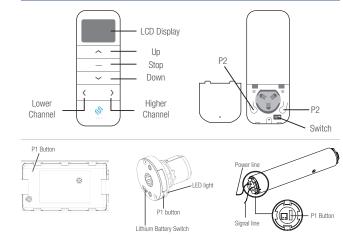

## Safety Instructions

- 1. Do not expose motor to humid, damp, or extreme temperature conditions.
- 2. Do not drill into motor.
- 3. Do not cut the antenna. Keep it clear from metal objects.
- 4. Do not allow children to play with this device.
- 5. If the power cable or connector is damaged, do not use.
- 6. Ensure the correct crown and drive adaptor are used.
- 7. Ensure the power cable and aerial is clear and protected from moving parts.
- 8. Cable routed through walls should be properly isolated.
- 9. Motor is to be mounted in horizontal position only.
- 10. Before installation, remove unnecessary cords and disable equipment not needed for powered operation.
- 11. Installation and programming should be performed by a qualified professional. Use or modification outside the scope of these instructions may void warranty.

Do not dispose of in general waste Please recycle batteries and damaged electrical products appropriately

## Button Instructions

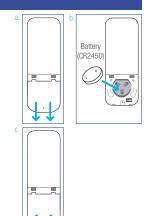

AMP25B / AMP28B

## Replace/Install CR2450 Battery

a. Unscrew with the screwdriver then gently press down the cover.

**AMPTILT** 

- b. Install battery (CR2450) with positive (+) side facing up.
- c. Gently assemble the cover back and replace screw with screwdriver

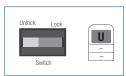

**AMPCELL** 

## Advanced Setting - Disable Limit Setting

- a. Remove the cover from the backside of remote, the lock switch is in the right corner.
- b. Move the switch to the "Lock" position to disable the following commands, remote will show "L" (lock):
- Change Motor Direction
- Setting the Upper and Lower Limit
- Roller Mode or Sheer Mode
- c. Move the switch to "Unlock" position to assess all remote functions, remote will show "U" (unlock).

\*This advanced feature is intended to be used after all shade programming is completed. User Mode will prevent accidental or unintended changing of limits.

## Channel Options

### Select A Channel

- a. Press "<" button on the remote to select a lower channel
- b. Press ">" button on the remote to select a higher channel.
