

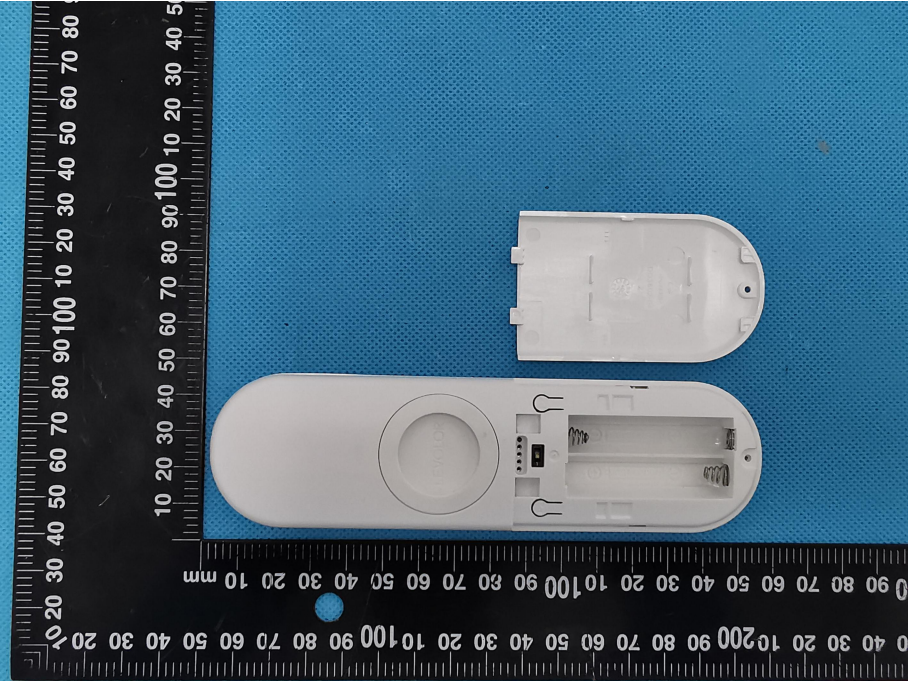

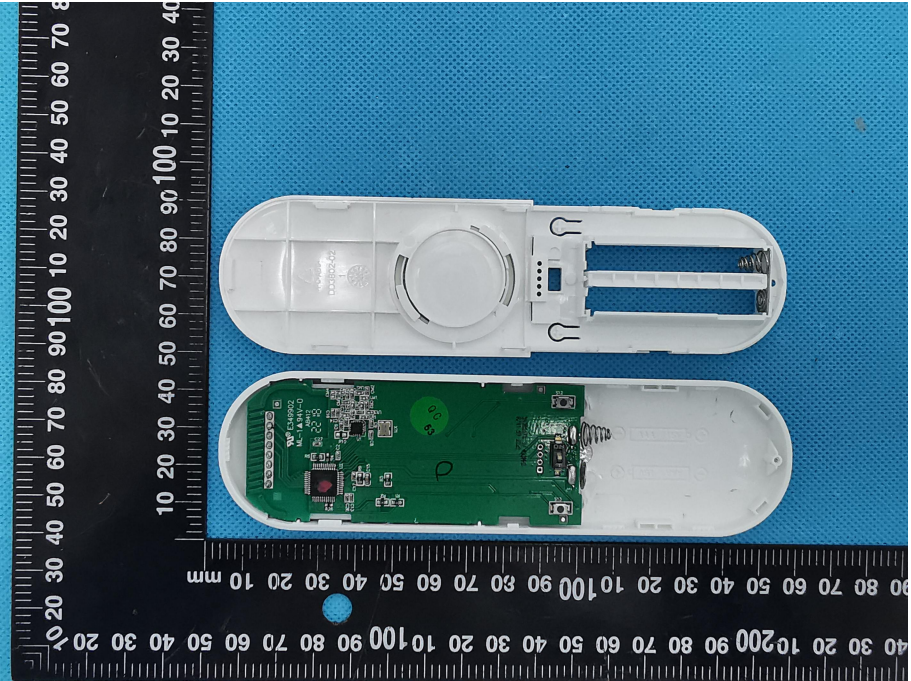

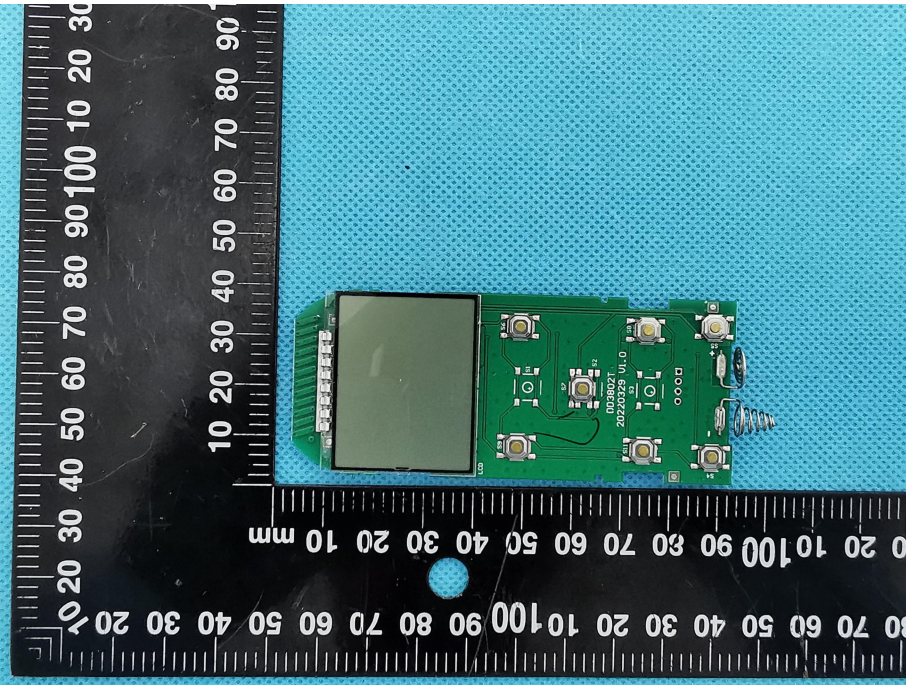

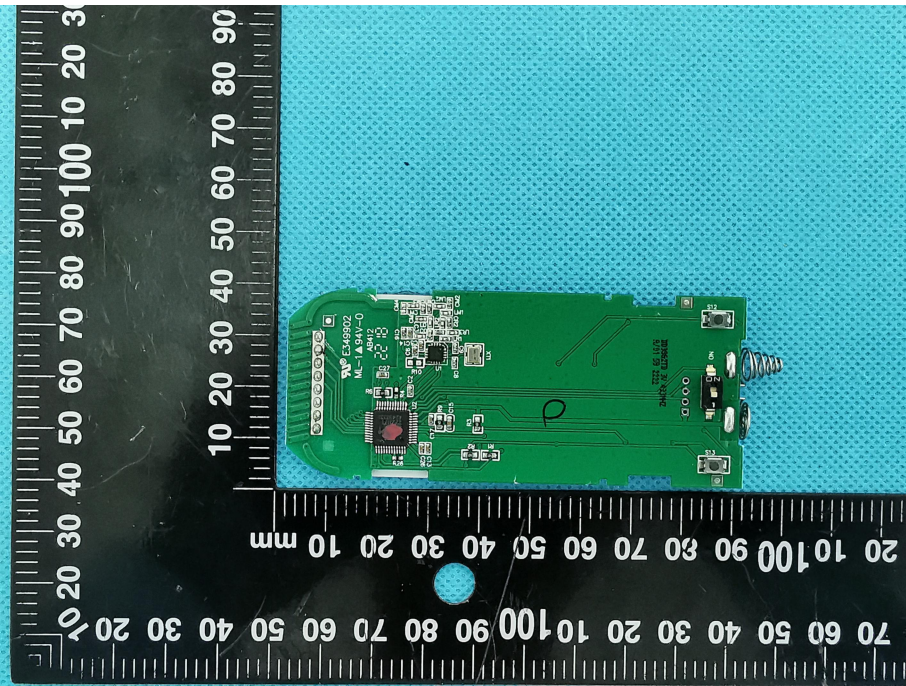

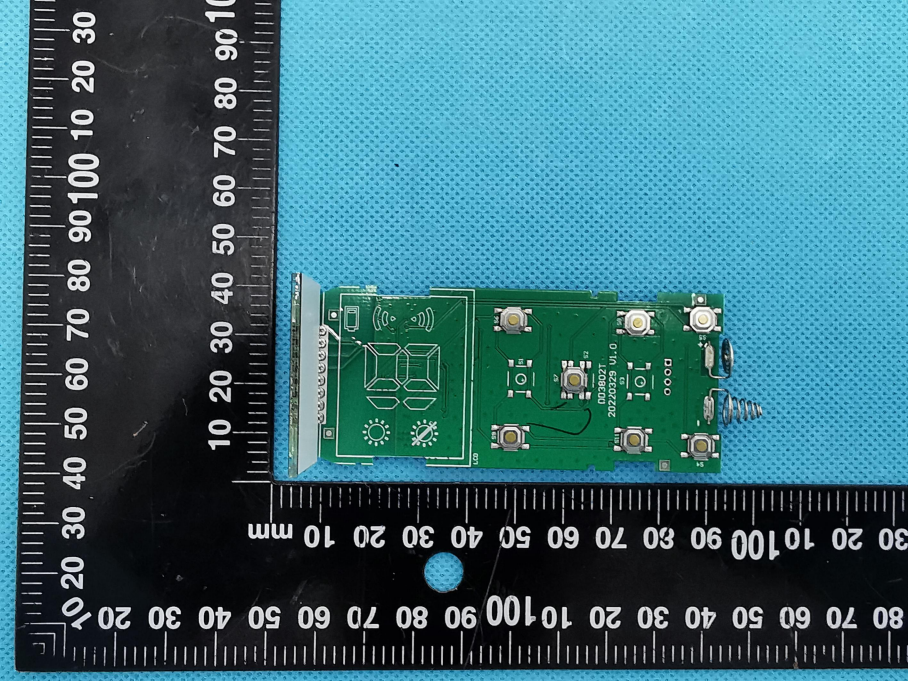

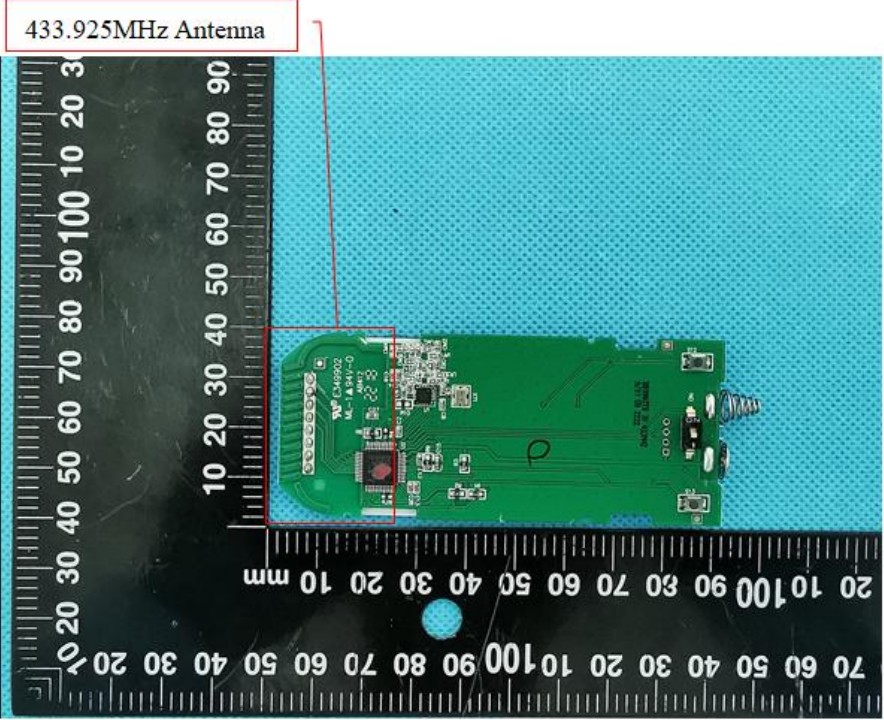

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	
<p><b>EUT Housing and Board View 2</b></p>	

<p style="text-align: center;"><b>Solder Board-Component View 1</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The board is oriented vertically and features a large, dark, rectangular component on its left side. The rest of the board is populated with various electronic components, including several surface-mount components and a small spring-like component on the right. The board is placed on a black background with a white ruler for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The board's length is approximately 100 mm, and its width is approximately 40 mm.</p>
<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The board is oriented vertically and shows the reverse side of the component. It is densely populated with various electronic components, including a large integrated circuit (IC) in the center, several smaller components, and a spring-like component on the right. The board is placed on a black background with a white ruler for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The board's length is approximately 100 mm, and its width is approximately 40 mm.</p>

<p style="text-align: center;"><b>Solder Board-Component View</b> 3</p>	 <p>A photograph showing the solder side of a green printed circuit board (PCB). The board is oriented vertically and is placed on a black surface with a white ruler for scale. The ruler has markings in millimeters, with the top edge showing 0 to 100 mm and the bottom edge showing 10 to 100 mm. The PCB features various components, including a large silver component at the top, several smaller components, and a coiled antenna on the right side. The board is set against a blue background with a white dot pattern.</p>
<p style="text-align: center;"><b>Antenna View</b></p>	 <p>A photograph showing the antenna side of the green PCB. The board is oriented vertically and is placed on a black surface with a white ruler for scale. The ruler has markings in millimeters, with the top edge showing 0 to 100 mm and the bottom edge showing 10 to 100 mm. The PCB features a large silver component at the top, several smaller components, and a coiled antenna on the right side. A red box highlights the antenna area, and a red line points to a callout box containing the text "433.925MHz Antenna". The board is set against a blue background with a white dot pattern.</p>
