

<p style="text-align: center;">Solder Board-Component View 6</p>	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is rectangular and contains various electronic components, including a microcontroller and several surface-mount components. A ruler is placed below the component for scale, showing markings from 0 to 100 mm. The component is positioned between the 10 mm and 40 mm marks on the ruler.
<p style="text-align: center;">Solder Board-Component View 7</p>	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is circular and contains various electronic components, including a microcontroller and several surface-mount components. A ruler is placed below the component for scale, showing markings from 0 to 100 mm. The component is positioned between the 10 mm and 40 mm marks on the ruler.

<p style="text-align: center;">Solder Board-Component View 8</p>	 <p>A photograph showing a green circular component with a gold-colored tab, mounted on a blue textured surface. A black ruler with white markings is visible on the left and bottom, indicating dimensions in millimeters. The component is positioned near the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing a white antenna wire connected to a green component on a blue textured surface. A red box highlights the antenna wire, and a red line points to a label that reads "433.92MHz Antenna". A black ruler with white markings is visible on the left and bottom, indicating dimensions in millimeters. The antenna wire is positioned near the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler.</p>
