## Instructions

### Proper fit:

When ready to insert into ear. Roll and compress the foam tip between your fingers. Insert into your ear and hold in place for 10-15 seconds to allow the foam to expand and seal within your ear. Properly sealed earbuds will significantly reduce outside noise – muffling the ambient sound. - *Be sure to have the product OFF when testing how well the foam tips have been seated in your ears.*

### Power On/Off:

Turn the power on/off by holding the Bluetooth multifunction button for 2 seconds.

### Volume Control:

Volume can be increased or decreased by pressing the Volume + or Volume – button

### Charging:

With the unit plugged in the LED will illuminate red while charging. When fully charged the LED will turn blue.

**NOTE:** When device is in the OFF position, the ear buds will still provide passive NRR.

### Pairing the device:

When the unit is first turned ON it will search automatically for the last paired device and then connect, if a device is not found it will search for a few minutes and if not paired, Bluetooth will automatically enter pairing mode. In Pairing Mode, the light will flash Blue then Red until paired.

Follow the instructions on the device you would like to pair with to locate and connect to “Walker RPE” (Note: Auto re-connects to previous last connected device during pairing if the BT device has been paired previously). Once paired, the blue LED will be flashing every few seconds.

### Answer Call:

Short press the BT Pairing button to answer incoming call.

### Reject Call:

Double press the BT Pairing button to reject the call.

### Cancel/end call:

Short press the BT Pairing button to cancel/end call.

### Last number redial:

Double press the BT Pairing button to re-dial the last phone number.

### Audio Pause/play:

Short press the BT Pairing button to pause/play music.

Skip a song by holding the BT volume up/Down

## NRR Information

Although hearing protectors can be recommended for protection against the harmful effects of impulsive noise, the Noise Reduction Rating (NRR) is based on the attenuation of continuous noise and may not be an accurate indicator of the protection attainable against impulsive noise such as gunfire.

The level of noise entering a person's ear, when hearing protector is worn as directed, is closely approximated by the difference between the A-weighted environmental noise level and the NRR.

### FCC NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Shielded interference cable must be used with the equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules. Specifications and designs are subject to change without any notice or obligation on the part of the manufacturer.

**Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device"**

**This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
