

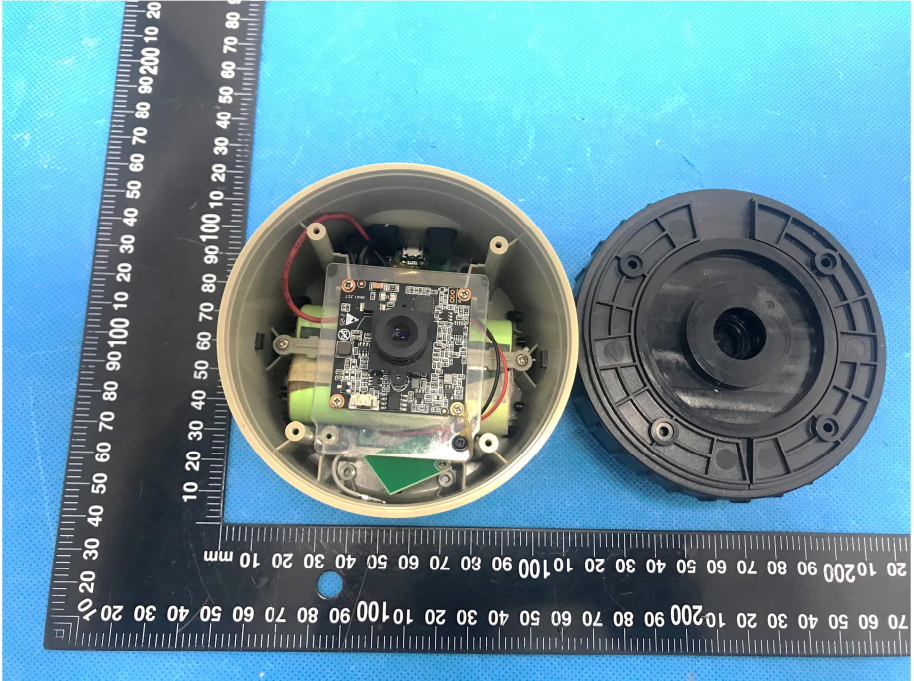

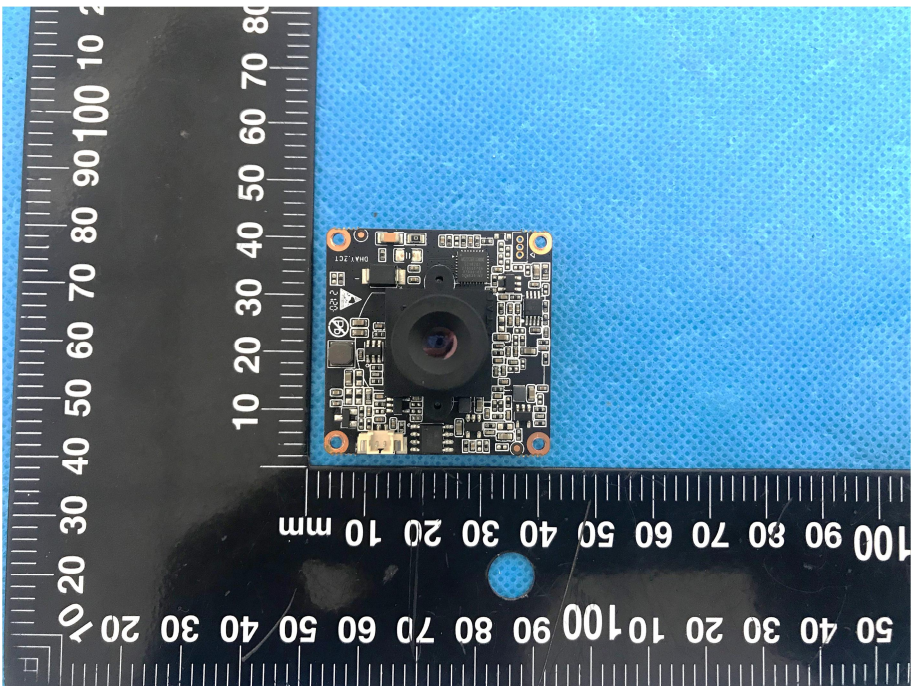

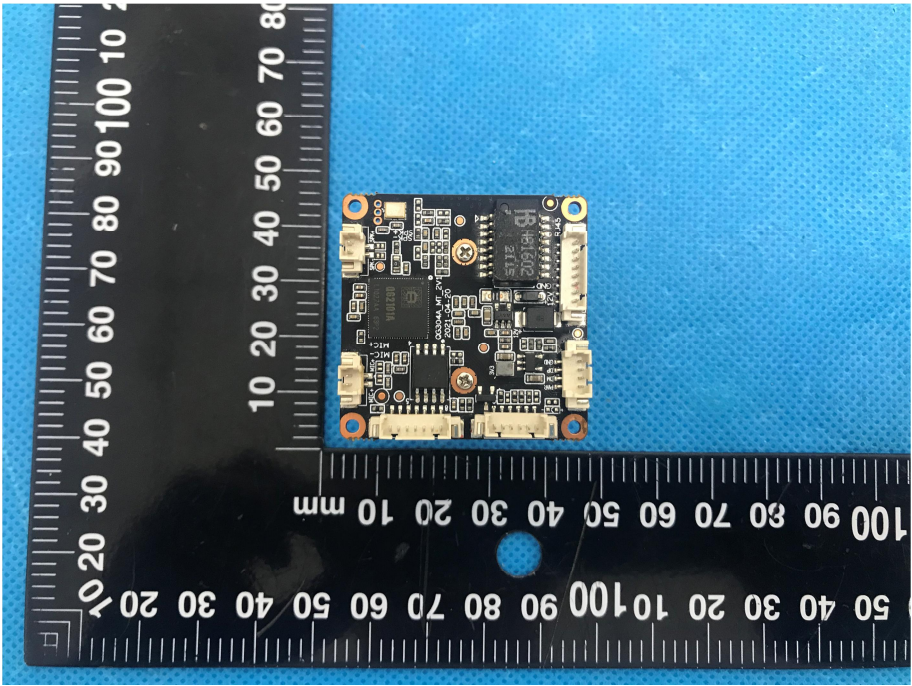

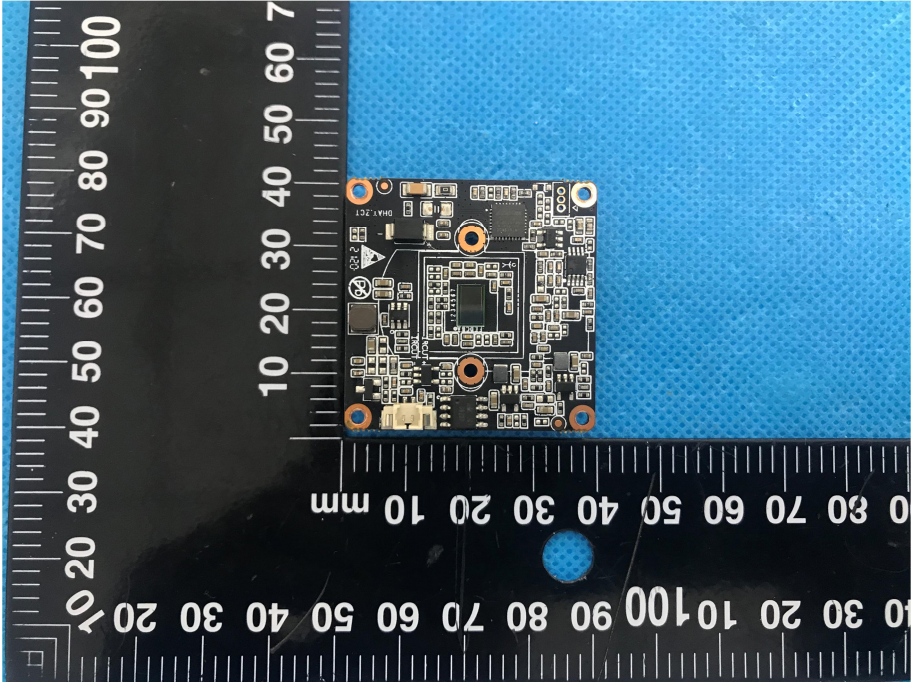

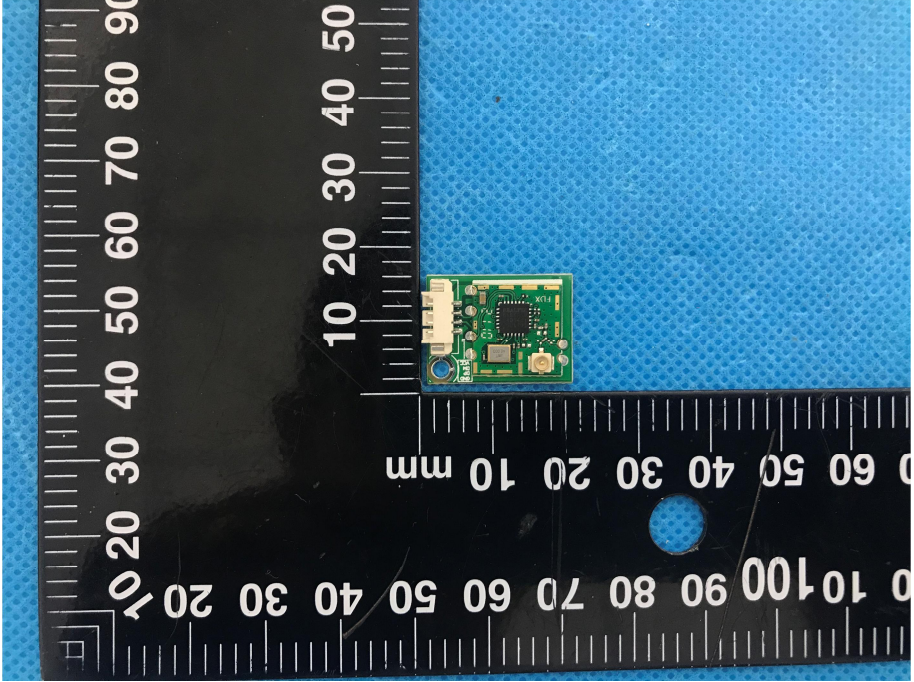

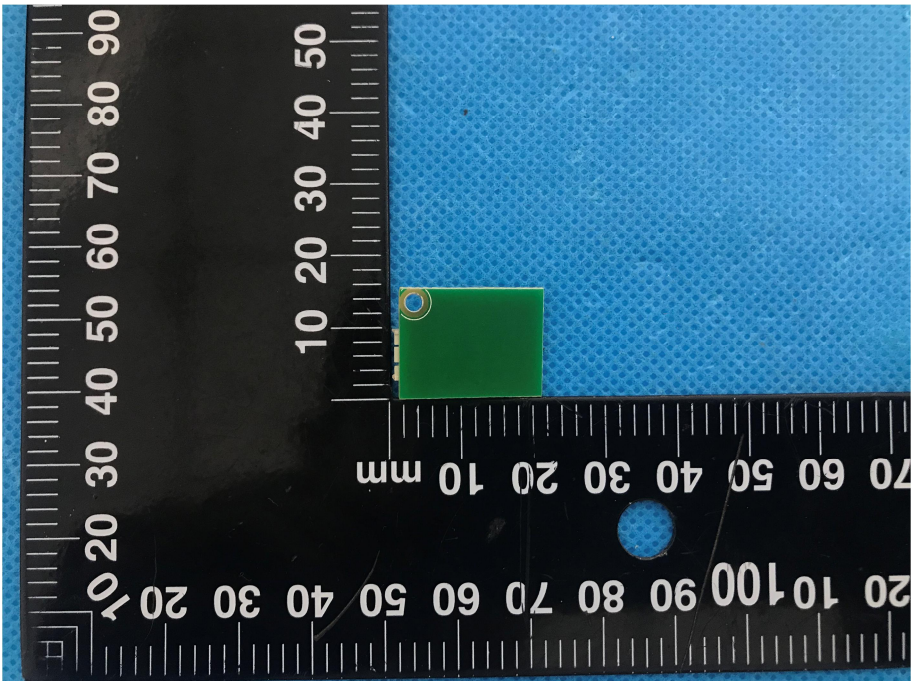

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of the EUT housing. The housing is a light-colored plastic shell, and the internal board is a green PCB with various electronic components, including a camera lens, resistors, and capacitors. A black ruler is placed next to the housing for scale, showing measurements in millimeters and centimeters.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the solder board component. The board is a small, square PCB with a camera lens in the center. It is surrounded by various electronic components, including resistors, capacitors, and integrated circuits. A black ruler is placed next to the board for scale, showing measurements in millimeters and centimeters.

<div>Solder Board-Component View 2</div>	 A photograph of a small, square electronic component board, likely a module, placed on a blue textured surface. The board is surrounded by a black L-shaped ruler with white markings in millimeters. The ruler shows dimensions of approximately 100mm by 100mm. The component board is positioned in the upper right quadrant of the ruler's frame.
<div>Solder Board-Component View 3</div>	 A photograph of the same small, square electronic component board, viewed from a different angle. It is placed on the same blue textured surface and surrounded by the same black L-shaped ruler. The ruler's markings are visible, showing dimensions of approximately 100mm by 100mm. The component board is positioned in the upper right quadrant of the ruler's frame.

<p>Solder Board-Component View 4</p>	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one in millimeters (0 to 100 mm) and one in centimeters (0 to 10 cm). The component is located approximately at the 10 mm mark on the millimeter scale.
<p>Solder Board-Component View 5</p>	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one in millimeters (0 to 100 mm) and one in centimeters (0 to 10 cm). The component is located approximately at the 10 mm mark on the millimeter scale.
