GETTING STARTED

Lift the magnetic latch and unfold the Wireless Charger so all three coils are flat on the surface. Connect to the included Type-C Wall Charger using the included Cable. Blue LED lights will illuminate indicating the device is powered on.

WARNING: Make sure the Charging Pads are free from any other material before trying to charge a device.

USING THE DEVICE

Your devices must support Qi wireless charging. Simultaneously Charge 3x devices at once. Place your phone or wireless headphones on the center of the Charging Pad. The corresponding Indicator Light will turn blue when a device is being charged and will flash if not properly placed on the Charging Pad.

Note: Phones with cases such as Otterbox and LifeProof cases that are generally more bulky and more thick than 3mm may not work with the wireless charger. It is recommended to remove the case to wirelessly charge a device.

Correct Placement

Incorrect Placement

The (2) 15W wireless Charging Pads are MagSafe compatible. If a MagSafe compatible device is placed on the Charging Pad, it will magnetically attach and begin charging.

Limitless Innovations

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
