## Data Reuse Justification

To whom it may concern:

We are applying data reuse for FCC ID 2AUCY-V2322(Variant) of DSS/DTS/NII/PCE/SAR based on reference FCC ID 2AUCY-V2247(Original).

FCC ID 2AUCY-V2322 is the variant from FCC ID 2AUCY-V2247. They have the same dimension and share the same PCB layout, antennas and components in WWAN, WLAN and Bluetooth. Only has below difference:

1. Remove NFC by hardware and software.
2. Remove macro camera.
3. Back cover change from glass to plastic.
4. Add a new charger
5. Software version change to PD2280UF\_EX\_A\_13.0.9.3.W30

According to change items, WWAN, WLAN and Bluetooth data of the original model remain representative for the variant model (DSS/DTS/NII/PCE/SAR) and test reports for original model plus test reports with the spot check data for variant model have been submitted. The power to be listed on F-731 and FCC grants for these are the values detailed in the original reports as the spot check data shows all values within expected tolerances of the original model.

Item	FCC ID	
	2AUCY-V2247 (Original)	2AUCY-V2322 (Variant)
WiFi DTS	ZEWM2303000343RG05	ZEWM2310001500RG05
Bluetooth DTS	ZEWM2303000343RG04	ZEWM2310001500RG04
Bluetooth DSS	ZEWM2303000343RG03	ZEWM2310001500RG03
WiFi NII	ZEWM2303000343RG06	ZEWM2310001500RG06
WWAN PCE	ZEWM2303000343RG02	ZEWM2310001500RG02
SAR	ZEWM2303000343RG01	ZEWM2310001500RG01
Note	Indicated full set of test data. Values in these reports listed on grants	Spot check data used to confirm that original model data is representative for the variant model.

DFS has been fully tested on the variant model.

We confirm that test data reuse policy of KDB484596 D01 Referencing Test Data V02r01 has been followed and take full responsibility that the test data as referenced from the original model report represents compliance for the new FCC ID.
