- Application devices: Certified power adapter with USB2.0 (with output current over 1A) or USB3.0.

Download APP

1. Search the APP: "SMART LIFE" from Apple store or Google Play.

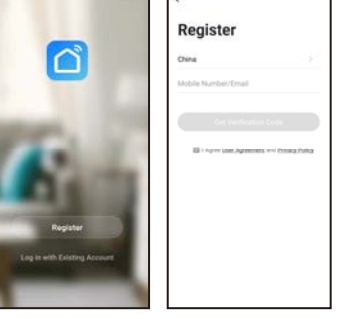

2. Scan the QR code from the label or user manual.

Android supports at least 5.0 system, iOS supports at least 10.0 system (App versions below 3.20 are iOS ≥ 9.0. Only suitable for mobile phones, not for tablets and other devices), Bluetooth devices ≥ V5.0.

Log in/Register an account

Open the APP - "Smart Life", sign up for a new account or log in with an existing account.

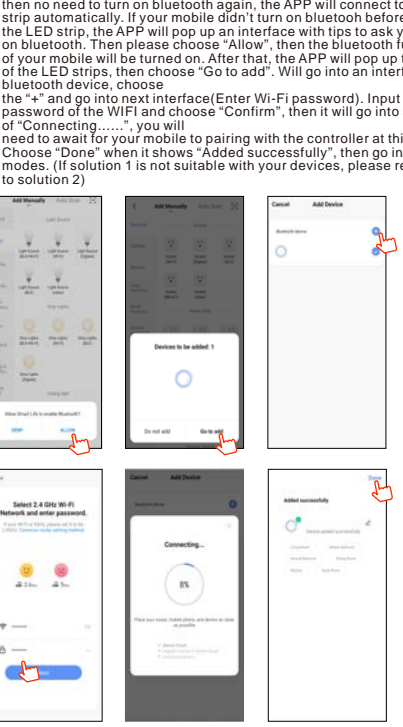

APP connection

1. Preparation jobs: Power on the LED ambient lamp and enter the home of APP, please make sure your mobile and the smart kits are connected to the same WIFI.

2. Connect the controller:

Solution 1): After powering on the strip, turn on and off 3 times (or long press the switch button for over 5 seconds), the strip will go into a status of quick flashing. Find the "+" (in the corresponding room of the APP) to add devices. If your mobile have already turned on bluetooth before connecting the LED strip, then no need to turn on bluetooth again, the APP will connect to the LED strip automatically. If your mobile didn't turn on bluetooth before connecting the LED strip, the APP will pop up an interface with tips to ask you to turn on bluetooth. Then please choose "Allow", then the bluetooth function of your mobile will be turned on. After that, the APP will pop up tips with info of the LED strips, then choose "Go to add". Will go into an interface of bluetooth device, choose the "+" and go into next interface (Enter Wi-Fi password). Input the password of the WIFI and choose "Confirm", then it will go into status of "Connecting.....", you will need to await for your mobile to pairing with the controller at this step. Choose "Done" when it shows "Added successfully", then go into operation modes. (If solution 1 is not suitable with your devices, please refer to solution 2)

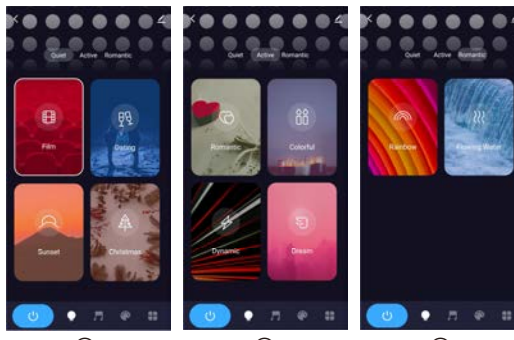

Solution 2): After powering on the strip, turn on and off 3 times (or long press the switch button for over 5 seconds), the strip will go into a status of quick flashing. Find the "+" (in the corresponding room of the APP) into interface of "Add manually". Then choose "lighting" to choose the correct smart devices and go into interface of "Select 2.4 GHz Wi-Fi Network and enter password". Enter the Wi-Fi password, then choose "Next" and waiting until pairing success (make sure your mobile and the smart devices are in the same Wi-Fi networks). Then go into the interface of "Scanning devices", after scanning success and choose "Next", it will pop up interface of "add successfully" and choose "Done" to go into the operation modes.

3. When connecting with the power supply, the led strip not flash. Please press the function button for over 5 seconds, then the light flash, enter into the APP and choose to add all the device in the corresponding room in the APP. Enter into the interface of adding lighting device and match the LED strip.

In the Smart Life APP: Find more service in "Me" menu, and find "More service", you'll find the third-party access service (Alexa, Google Assistant, Tencent Xiaoweil/DuerOS/Dingdong etc), select the service you need. Connect to the third-party service device according to the operation guide.

Please contact customer service for any update of product or APP.

How to create/dismiss device groups?

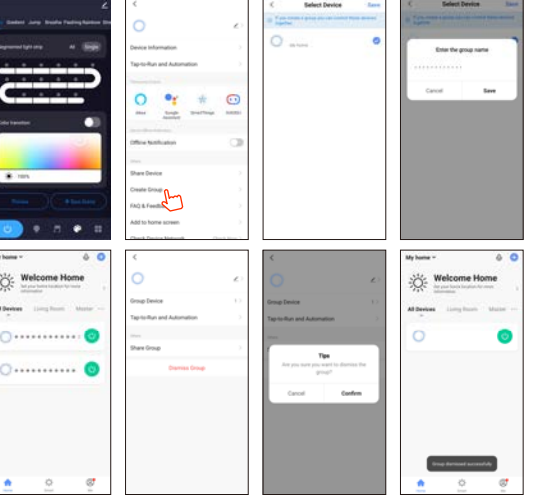

Please you do so:

- Tap a device in the device list to enter the device's control panel.
- Tap the button in the upper right corner to enter the device editing page.
- Tap Create Group. On the Select Device page, all devices that have been added to the account and have the same model as the device are displayed.
- On the device group page, click the button in the upper right corner to enter the settings page, and click the "Dismiss Group" button at the bottom of the page to dismiss this device group.
- If you want to manage different types of devices or devices that don't support groups, you can add these devices to one "Tap-To-Run/Automation" to meet your needs.
- If the group creation fails, please click to view the solution.

Unable to create a device group?

Please check in the following ways:

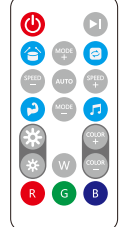

- Please click on the upper right corner of the device to enter the interface, and check if you can see the "Create Group" function.
- If you can see it, click on it and create a group.
- If you do not see "Create Group" on device setting page, it means that the device does not support group settings (Not all types of equipment support group functions).

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
