For Mirror and Beauty

5) A very few smart phones, even they are iOS 8.1 or Android 4.1 and higher, they may still not be connecting with the light strip. How to fix it?

Please set the Wi-Fi letters and Arabic numbers only.

Troubleshooting

1. Why do the strip lights not connect with Wi-Fi?

for the 2.4G Wi-Fi and 5G Wi-Fi, if you have a dual-band router.

1) 2.4GHz internet only. Please check your Wi-Fi type. Please set a different SSID

2) The Wi-Fi signal should be strong. Please take the LED light strip closer to the

3) Complicated Wi-Fi name and password. Type in the correct Wi-Fi password.

4) Smart phone operation system is iOS 8.1 or Android 4.1 and higher.

router or reboot your router, and also ensure there is stable private Wi-Fi internet.

I) Please prepare 2 smart phones, set one of them as a Wi-Fi hotspot, and download the smart home app on the other phone, try to connect the light strip with these phones. Please make sure that the hotspot is set to 2.4GHz, and hotspot password letters and numbers only.

II) Read the manual carefully, try "EZ mode" and "Backup AP Mode".

#### 2. The device is offline or unreachable.

- Make sure your Wi-Fi router is online and in range - Make sure you have the latest Smart Life, by clicking "Me" - "Setting" "About" - "Check for Updates" - Make sure the Wi-Fi password has not been changed.

### 3. Light strip falls down.

The strip is made of very strong foam tape. Please clean the mount surface, keep it free from dust and oil, the tape will hold the light strip for years.
