

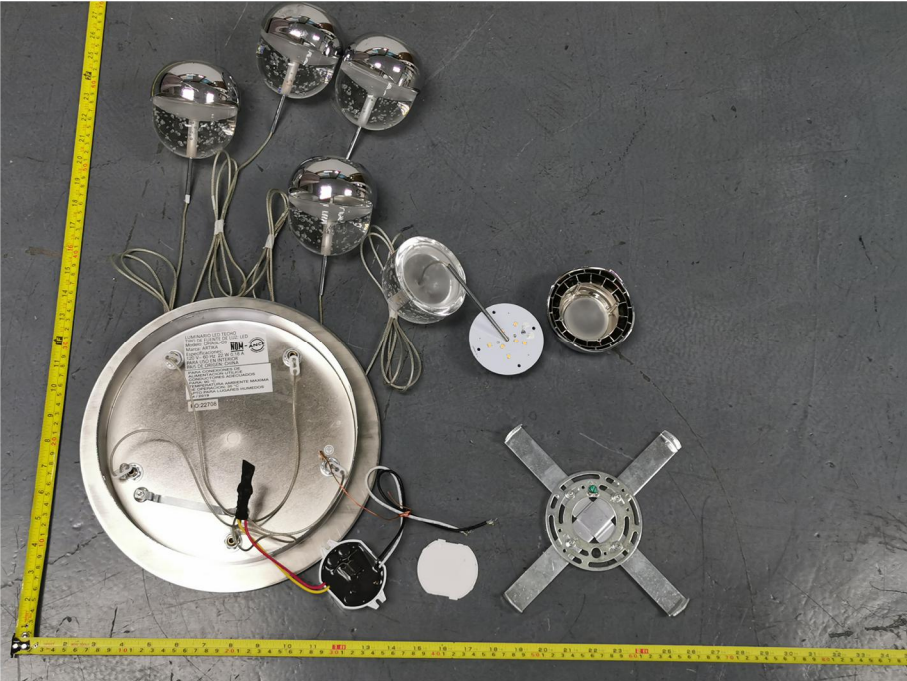

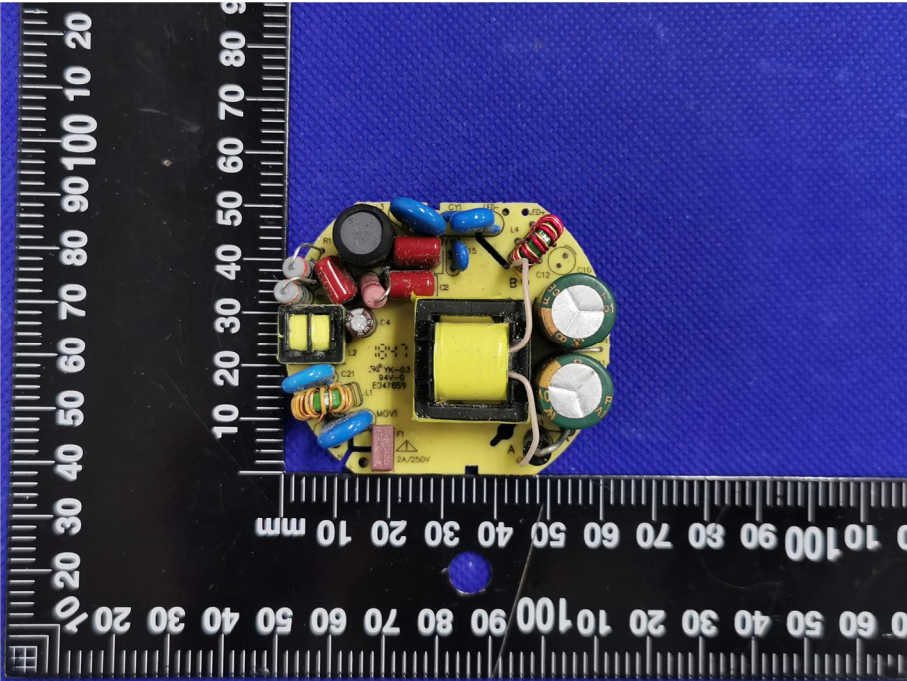

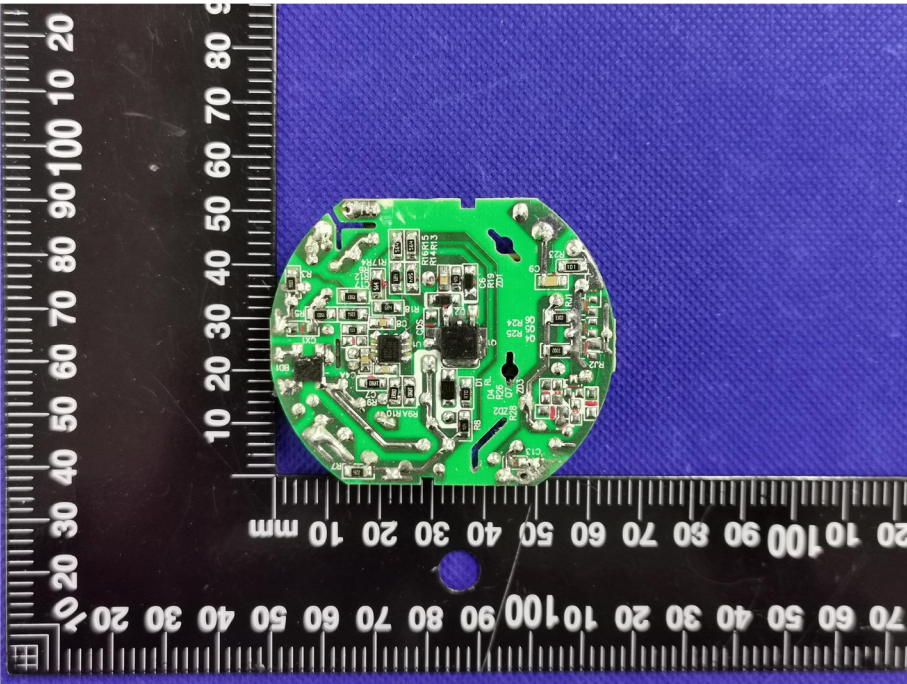

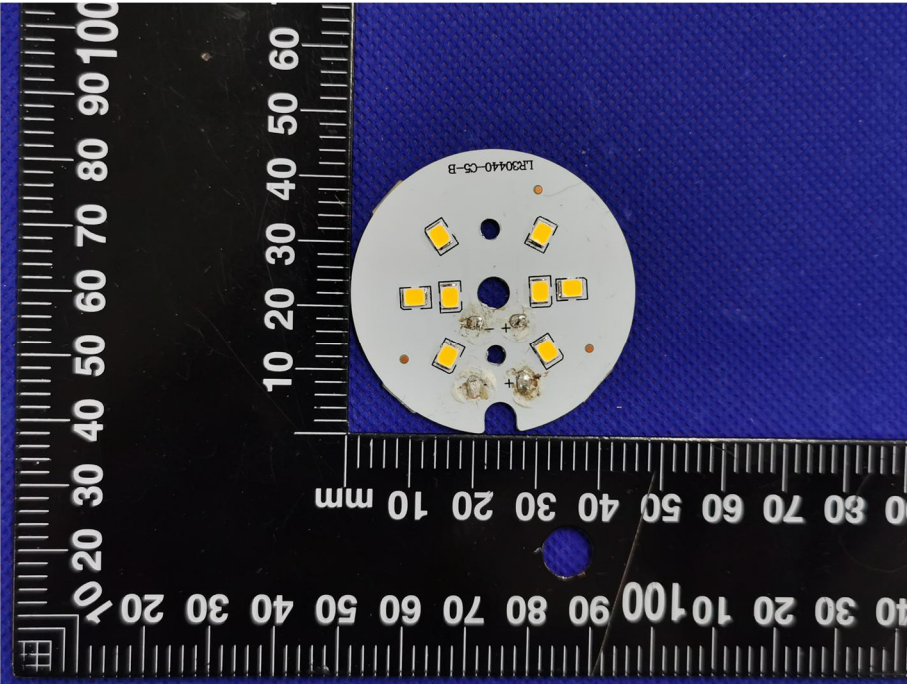

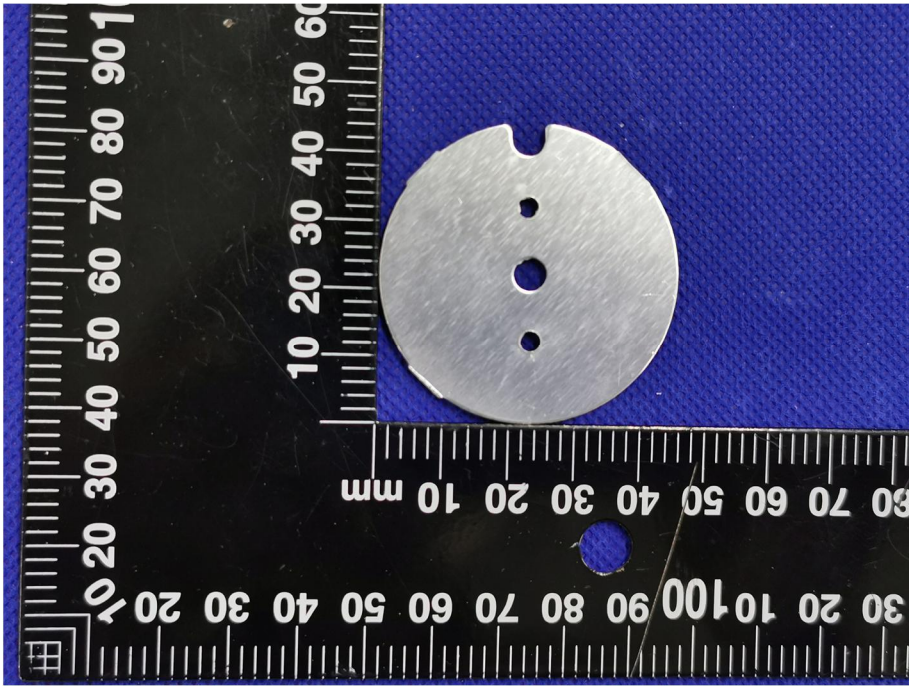

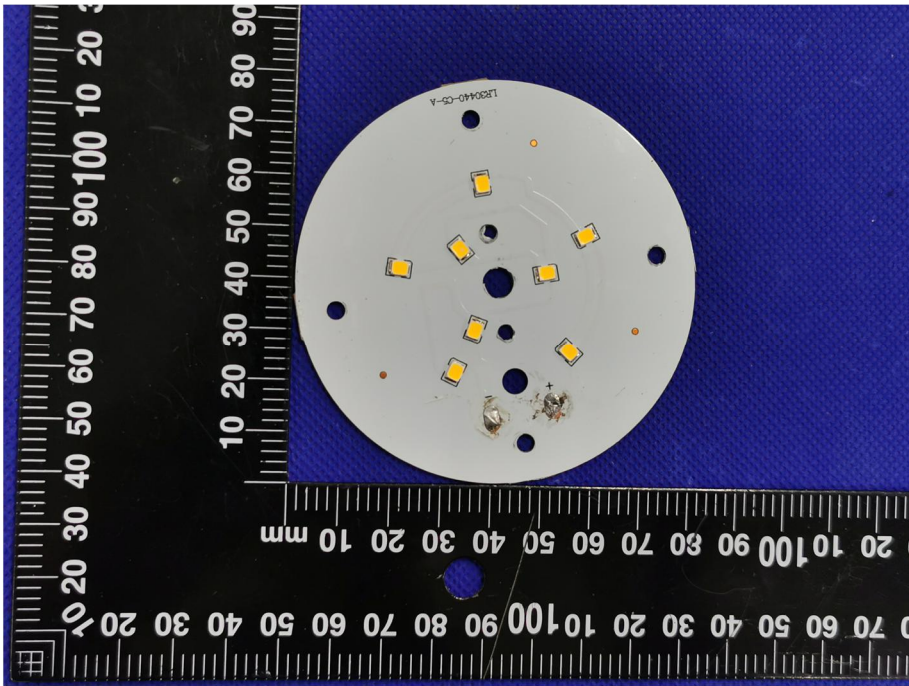

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the disassembled components of an Electronic Under Test (EUT) housing and board. The components are laid out on a dark grey surface. A yellow measuring tape is placed vertically on the left and horizontally at the bottom for scale. The components include a large circular metal housing with a label, several small circular metal caps, a printed circuit board (PCB) with various components, and a metal cross-shaped bracket.
<p>Solder Board-Component View 1</p>	 A close-up photograph of a soldered PCB component. The component is a yellow PCB with various electronic components, including capacitors, resistors, and a transformer. A black ruler with white markings is placed around the component for scale. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is placed on a blue textured background.

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of a circular green printed circuit board (PCB) component. The board is densely populated with various electronic components, including integrated circuits, resistors, and capacitors. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's diameter being approximately 100 mm.</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a circular white PCB component. The board features several yellow square components, likely LEDs, and some surface-mount components. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's diameter being approximately 100 mm. The text "LR30440-C5-B" is visible on the board.</p>

<p style="text-align: center;">Solder Board-Component View 4</p>	 A circular metal component with a brushed finish, featuring three small circular holes and a semi-circular notch at the top. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's diameter being approximately 60 mm.
<p style="text-align: center;">Solder Board-Component View 5</p>	 A circular metal component with a smooth finish, featuring several small square and circular features, some of which are yellow. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's diameter being approximately 60 mm. The text "125040-05-A" is visible on the component.
