

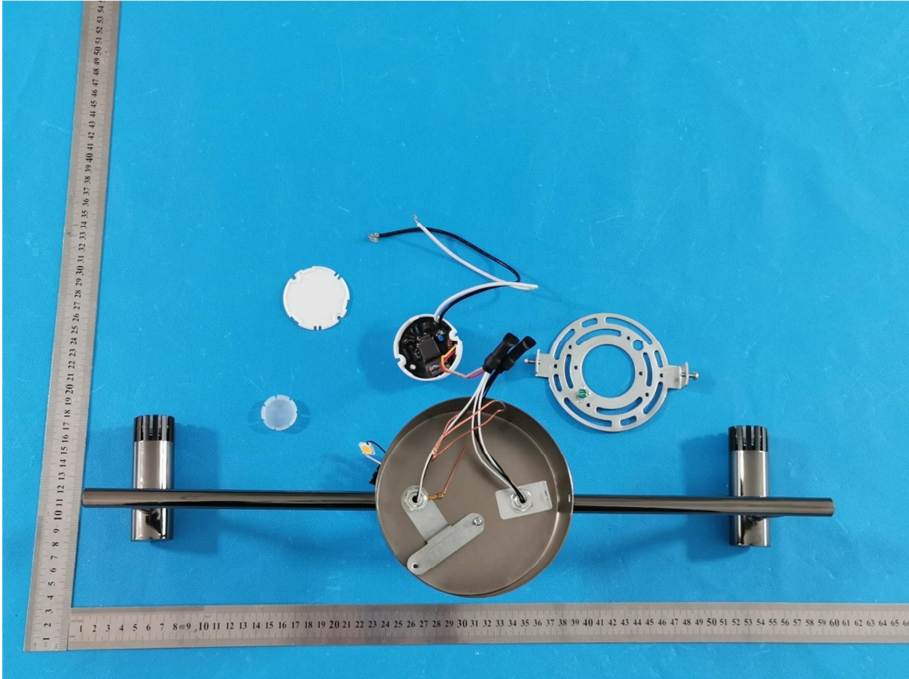

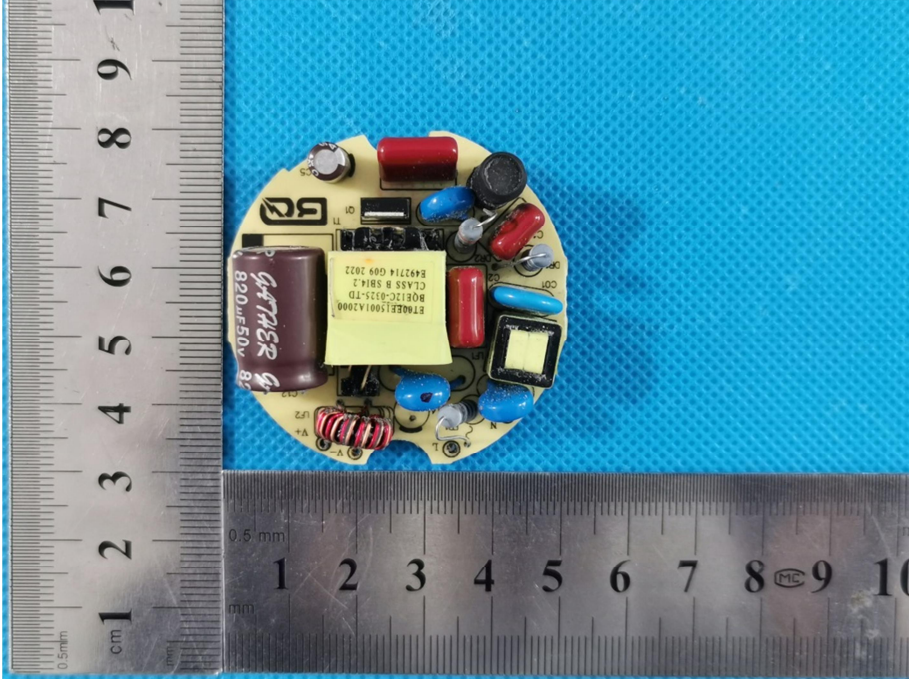

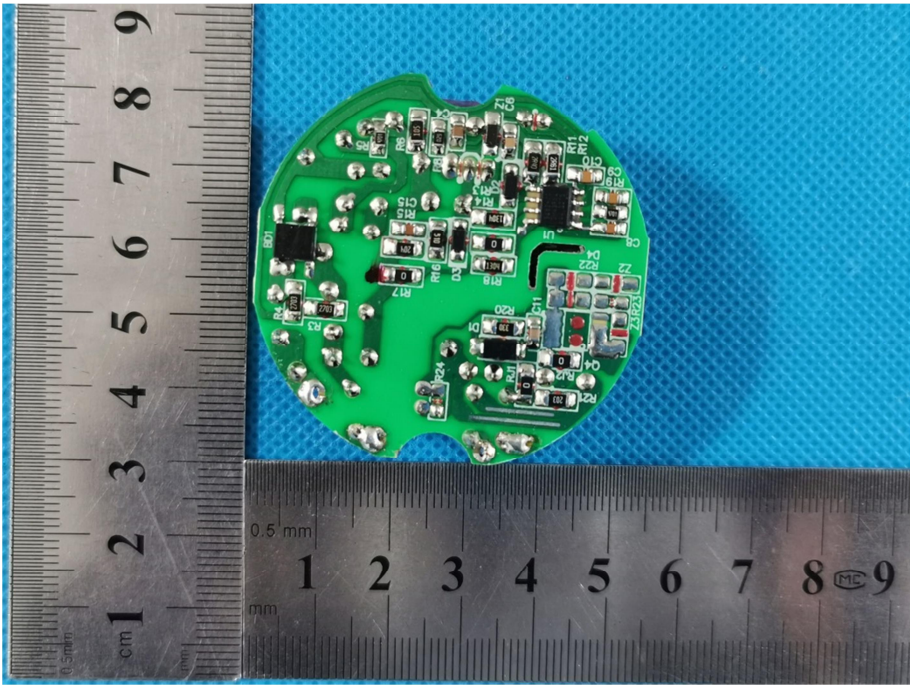

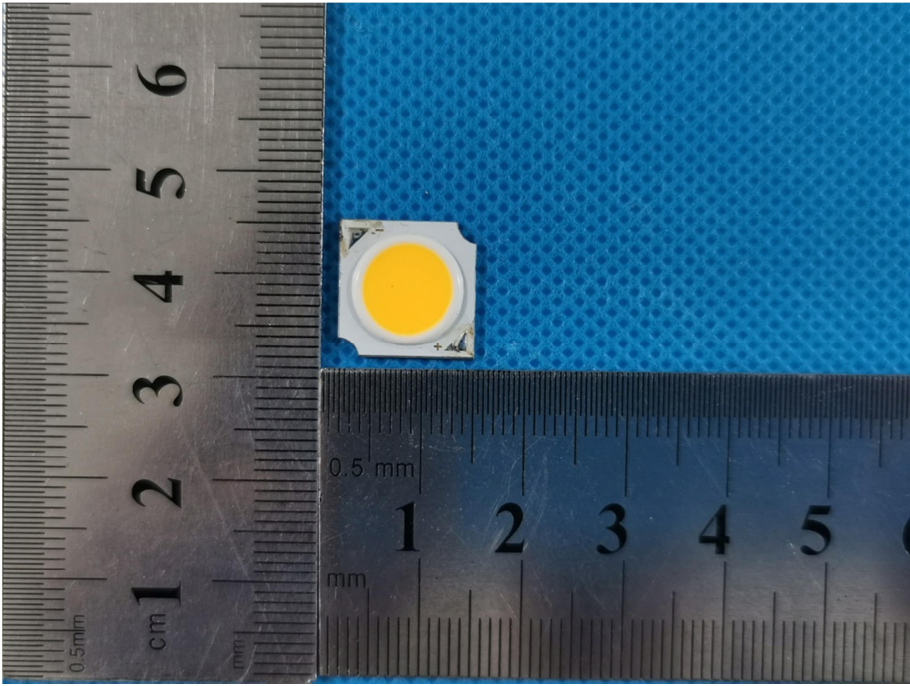

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>This photograph shows the disassembled components of the EUT housing and board. The central component is a circular metal housing with a printed circuit board (PCB) mounted inside. The PCB is populated with various electronic components, including a large electrolytic capacitor, a transformer, and several resistors. The housing is secured by two screws. A ruler is placed horizontally below the components for scale, showing measurements in centimeters and millimeters. The background is a blue textured surface.</p>
<p>Solder Board-Component View 1</p>	 <p>This photograph provides a close-up view of the soldered board component. The circular PCB is densely packed with electronic components, including a large electrolytic capacitor, a transformer, and several resistors. The components are soldered to the board. A ruler is placed vertically to the left and horizontally below the component for scale, showing measurements in centimeters and millimeters. The background is a blue textured surface.</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of a green, circular printed circuit board (PCB) populated with various electronic components. The board is placed on a blue textured surface. A metal ruler is positioned vertically on the left side of the board, showing a scale from 1 to 9 centimeters. A second metal ruler is positioned horizontally below the board, showing a scale from 1 to 9 millimeters. The components on the board include resistors, capacitors, and integrated circuits, with labels such as R1 through R24, C1 through C10, U1, U2, and Z1 visible.</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a single, square component with a yellow circular center, likely a light-emitting diode (LED), mounted on a blue textured surface. A metal ruler is positioned vertically on the left side of the component, showing a scale from 1 to 6 centimeters. A second metal ruler is positioned horizontally below the component, showing a scale from 1 to 5 millimeters.</p>
