

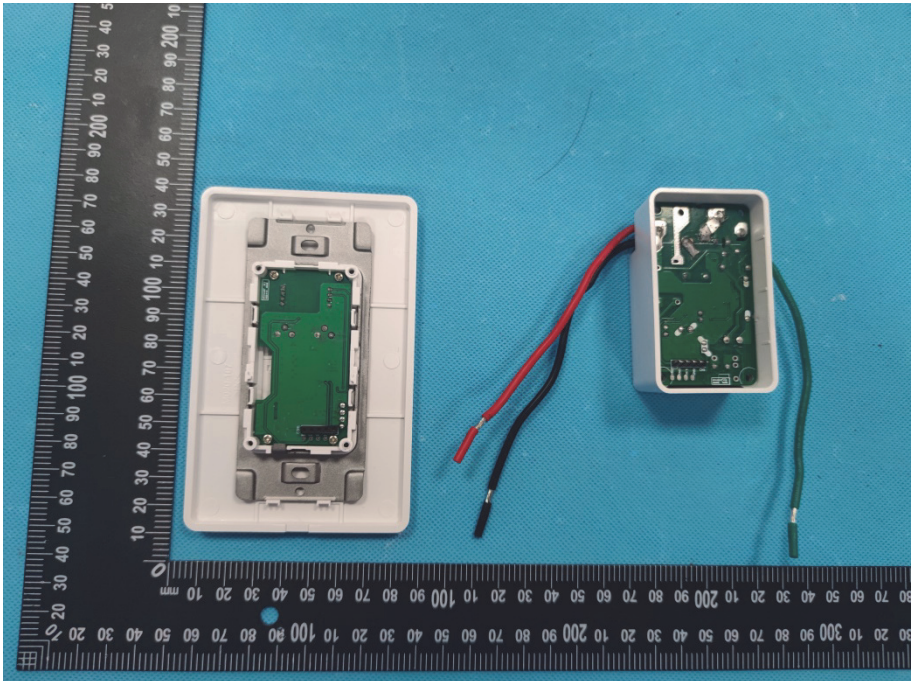

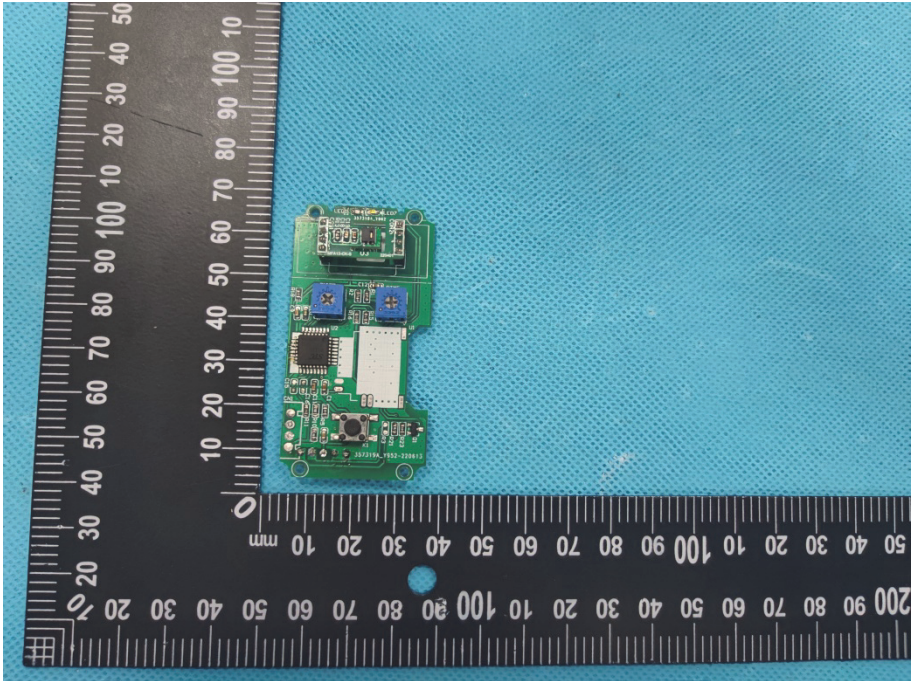

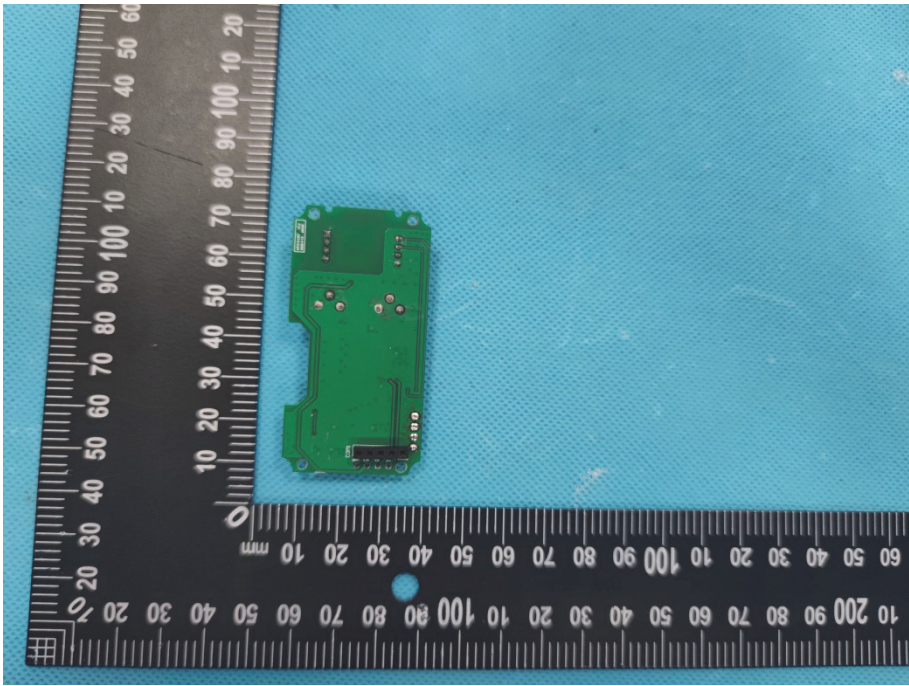

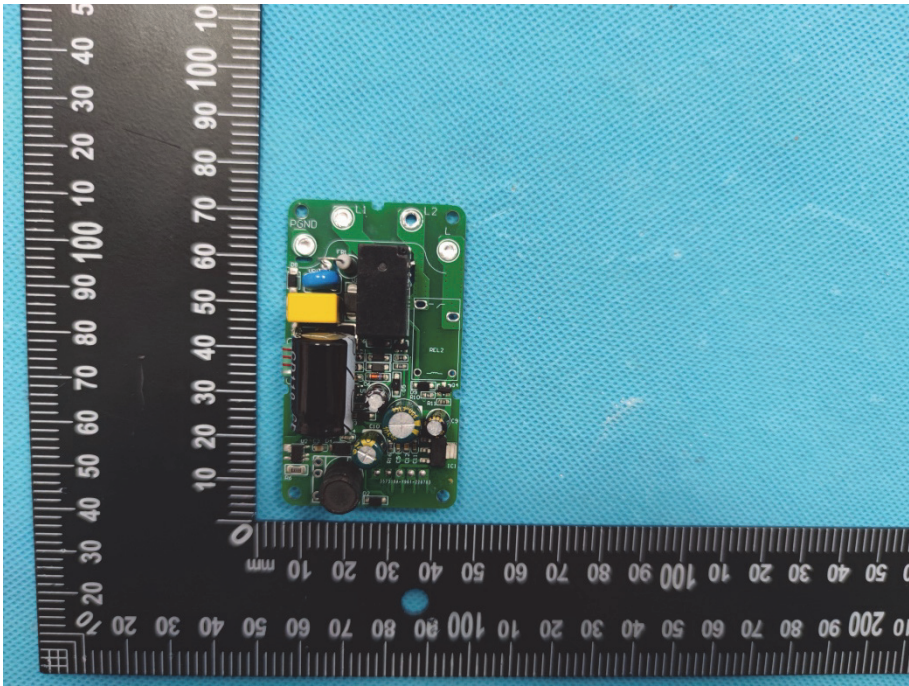

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>A photograph showing the EUT housing and board assembly. On the left is a white plastic housing with a green PCB mounted inside. On the right is the same assembly with the housing removed, showing the board and two wires (red and black) extending from it. A black ruler with white markings is placed vertically to the left of the components for scale.</p>
<p>Solder Board-Component View 1</p>	 <p>A close-up photograph of the solder board component. The green PCB is shown with various components, including a large black chip, several blue capacitors, and other surface components. A black ruler with white markings is placed vertically to the left of the component for scale.</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a small, rectangular green printed circuit board (PCB) component. The board is positioned vertically on a blue textured surface. To the left of the board is a black ruler with white markings, showing measurements in millimeters from 0 to 100. The component has several small components and solder joints on its surface, though they are not clearly visible in this view.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of the same green PCB component as in View 2, but from a different angle. This view shows more detail of the component's surface, including a yellow component, a black component, and various solder joints. The ruler and blue background are also visible, providing a scale for the component's size.
