VISTA TECH 2 IN 1 WIRELESS AUDIO TRANSMITTER RECEIVER

Instruction Manual

1. Product Introduction

This compact wireless 3.5mm audio adapter lets you manage audio signal freely according to your needs. All devices with an AUX 3.5mm audio port are supported - the possibilities are limitless!

Receiver mode

When used as a wireless receiver, the RX-TX-10 transforms any traditional car or home system with an AUX connection into a contemporary piece of audio equipment. Use it in this mode to play music from a smartphone on your trusty non-Bluetooth stereo system.

Transmitter mode

As a transmitter, this Bluetooth audio adapter allows you to send audio from a device with an AUX port to any Bluetooth headphones or set of speakers. Use it in this mode to cast TV audio to your wireless headset when gaming or binge-watching your favourite series late at night.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
