How to Charge the Headphone

Make sure the headphone is fully charged before first use.

- The headphone has a built-in li-on battery, which must be charged at least once every 2 months if it is not used for a long time.
- Use the USB type C cable to charge the headphone, you can use any USB power input 5V 500mA adapter included, and the computer USB port is fine.
- When charging, the headphone will automatically shut down, and the indicator light shows below

Charging instructions:
When charging indicator light, red light is steady on.
When fully charged, turn on the blue light.

Type-c charging port

Restore factory settings

If the headset is stuck or other functions cannot be used normally, you can click "⏻" red and blue lights on twice for 3 seconds, the red and blue lights will flash alternately, and the headset will be restored to factory Settings.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
