## Call logs

You can view your recent call situation.

**[Missed calls]:** Show all missed calls list, select a view after a missed call occurred the date and time, phone number and times.

**[Dialed calls]:** Show all dialed calls list, select a view after a dialed calls occurred in the date and time, phone number and times.

**[Received calls]:** Show all answered the phone list, select a view after a phone that has the date and time of occurrence, telephone number, frequency

**[Rejected calls]:** Show all refused to answer the phone list, select a view after a missed call occurred the date and time, phone number and times.

Press the OK softkey to enter the options menu can be more

---

---

than the number of call records in the following:

- Details: View the current record date, time, type.
- Call: Call the current number
- Write message: send the current record of SMS
- Add to contacts: the number of the record the name

added to the existing record which

- Add to blacklist: the current record to reject a call which
- Delete: Delete the currently selected record
- Delete all: Delete all call records
- Mark: Mark to operation

**[Delete all]:** Delete all call records

**[Call times]:** Last time zero starting time for last call statistics, a total of dialed calls, received calls, all calls total, all the time can also be zero.

**[GPRS counter]:** Display the SIM card GPRS data.

---

---

## Contacts

You have 2 phonebooks in this mobile phone: SIM card and the mobile. The mobile can store 300 phone numbers and the SIM card's capacity depends on its type.

In standby mode, enter a number, press the call key pieces to make a call, press the OK key to save

- If 'To SIM 1/2' is selected, users can edit name and number.
- If 'To phone' is selected, the user can edit the name, mobile number, image, ringtone, caller groups

Into the phone book list, the list on the left displays a small icon indicates that the record exists SIM card or mobile phone, the right is the record of the name and number information.

Standby mode, press the right soft key to enter into the

---

---

address book or from the menu

Into the address book, do the following:

**[New]:** Create a record to phone or SIM

**[Delete multiple]:** Choose one or more records to delete

**[Delete all]:** Select to delete all records

**[Delete Phone]:** Select to delete the phone record

**[Delete SIM1]:** Select to delete SIM1 record

**[Delete SIM2]:** Select to delete SIM2 record

**[Import/Export]:** Copy/Import/Export records to T-Card or phone

**[Others]**

[Own number]: Show own number

[Service number]: This function need SIM-card support

[Memory status]: Query the current SIM card and mobile phone storage capacity.

---

---

## Settings

### Call setting

#### [Dual-SIM]:

[Standby mode]: Dual SIM standby or standby only SIM1 or SIM2 only

[Reply by original SIM]: Reply the call/SMS by original SIM

[Set SIM name]: SIM1 and SIM2 in the card slot to set the display name

[Set dual SIM call divert]: Set the divert

[Call divert]: transfer a call, respectively SIM1/SIM2

- Call forwarding unconditional: Set a forwarding number, for forwarding all calls are
- Call forwarding on busy: set the forwarding number, transfer calls when in busy
- Call forwarding on no reply: Set a forwarding number, in case of no response transfer

---

- Diver if unreachable: to set the forwarding number in the phone unable to connect the case of transfer

- Cancel all diverts: cancel all of the transfer

[**Call waiting**]: open call waiting, respectively SIM1/SIM2

[**Call barring**]:respectively SIM1/SIM2 call for restrictions

[**Hide ID**]: respectively SIM1/SIM2 to hide the machine when the power numbers.

**\* SIM card, operators need to support**

[**Others**]:

[Call time minute reminder]: Select the open or closed during a voice call has prompted

[Auto redial]: Select whether to open automatically redial function

[Reply SMS after reject]: Select whether to reject messages or return after any key answer

[Auto record voice call]: Auto record the voice call

**Phone settings**

---

---

## [Date & time]

- Set time: set the phone to display the time
- Set date: set the phone to display the date
- Time format: Set the display time format
- Date format: Set the date display format
- Update time settings: Select open update time

[Language settings]: Select phone display language.

[Shortcut settings]: Set the function of shortcut

[Auto power on/off]: Set the time and frequency of Automatic Turning

[Power saving mode]: Implement the power saving mode

[Restore factory settings]: restore the factory settings

## **Display**

[Wallpaper settings]: Set wallpaper

[Idle display setting]: Set the idle

[Contrast]: adjust the screen's backlight brightness

[Keypad backlight time]: Set the backlight time key

---

---

[Auto keypad lock]: Set the auto keypad lock

## **Security**

[PIN]: Select open or modify the phone's PIN code

[Modify PIN2]: PIN2 choose to modify the phone code

[Phone locked]: Set the phone locked

[Modify the cellphone password]: Modify the password of phone

[Privacy]: set access to enter the password to view functionality. (Including: call logs / message / camera / phonebook / my files / ebook / calendar / U disk/audio player/video player)

[Lock screen by end-key]: press the end key to select whether the off-screen function

[Guardlock]:

To set the security password and open the feature, open the opportunity for the card and then prompts for security password, if the wrong password is entered three times, the

---

---

phone can receive within 24 hours of alarm information

[Fixed dialing]: Set the fixed dialing function

[Blacklist]: Set the list and type of blacklist

[Whitelist]: sets the whitelist list and type

## **Profiles**

[Add]: Add the new profile

[Delete]: Delete the profile

[Settings]: set the selected mode

[Rename]: Rename the profile

[Ring settings]

- SIM call ring: set the SIM card of the ringing tone
- SIM message ring: set the SIM card message tone

[Adjust volume]

- Caller ringtone: set the ringing tone volume
- Message ringtone: ring volume settings information
- Alarm & calendar volume; set the alarm tone
- Call volume: Set the volume of calls

- 
- Power ringtone: the voice of setting switch

[Ring type]

- Call alert: a ring, silent
- Message alert: a ring, silent
- Alarm & calendar remind: a ring, silent

[Other alert rings]

- Key tone: set the key tone of voice
- Battery low alert: Choose open the alert of battery low
- Power ringtone: Set the sound is turned Off
- Dial tone: Activate dial tone

## **Connections**

[Network account]: Create or edit the network account

[Add from list]: from the system built-in Internet account to add a new account

[Search]: from the current logged on to Internet search to the card account information, which added to the list after the

---

---

selected

[Delete]: delete the selected account

[Edit]: edit the currently selected account

## **Multimedia**

### **Camera**

The phone supports photo, so you can capture your favorite scenes anywhere. Photos will be saved in the phone comes with a file system, photographs as JPG format, you can phone provides photographs sent to a computer via USB connection to view, can also be set Image for the standby

Note: This function can work without driver under Windows XP by directly connecting your mobile to the computer

### **Image viewer**

View the image which in phone memory or T-card

### **Video recorder**

Set the parameter of DV and then use the function

### **Video player**

---

---

Use the function of video player

## **Music player**

Play audio files, MP3 songs; to play audio files, MP3 songs, press the Up and Down keys to adjust the volume, press the left and right keys to select the present, the next song, press the OK button for the on / off Music

[Music list]: Into playlist interface. Can be added to the playlist editing and other operations

[Add]: Add songs or music playlist bookmark

[Set as ringtone]: The song is set to call or alarm tone

[Shuffle]: Choose shuffle to play the music

[Repeat]: Choose one/all repeat

[Settings]:

- Equalizer: Choose a variety of equalizer effects
- Bluetooth audio output: Set the bluetooth output
- Bluetooth audio devices: Set the bluetooth headset

---

[Open review]: Open the function of review

[Exit]: Exit menu audio player

## **Sound recorder**

[Start recording]: Start recording

[Record file list]: The memory card inside the recording file list

[Storage]: Set the locate of storage

[File format]: Set the format of record file

## **FM radio**

[Auto search and save]: Channel auto search and save

[Channel list]: View channel list

[Save]: Save the channel to the channel list

[Manual search]: Manually enter the channel and find

[Open speaker]: Choose whether to open the microphone

[Background play]: Choose whether to open the Background Play

[Record]: Record the FM

---

---

[Scheduled recording]: Set the time to record

[Record file list]: The list of FM record file

[Help]: FM Help

## **Messaging**

The Messaging function is a network service. Sending and receiving Text can only be used if the service is proposed by your network operator.

You can send ordinary Text messages, enhanced Text messages. The SMS is sent to the Text messages center in the network firstly, and then to the target user. If the receiver's mobile is power off or cannot receive messages, the network will store the message temporarily and the store duration is determined by the user configuration and the service provider.

The message will be directly stored in the SIM card if the capacity is not full. A blinking icon at the head row of the

---

---

main screen will be displayed if the capacity is full.

### Messages unread

If the Text message has been sent to the receiver, a beep will sound. (If the tone for Text messages and message report are activated).

### **Write message**

- Send: Enter the appropriate number of the recipient or from the phonebook add
- Insert template: to the content of the message currently being edited into the common language
- Add contact info: Insert the contact person
- Add phiz: emoticons into the meaning of the representative
- Save as draft: will save the information to Drafts
- Exit: Exit message

### **Inbox**

- 
- Reply: reply to SMS to each other.
  - Delete: Delete short message
  - Call: choose a voice call or a call to the sender IP calls
  - Lock: lock cannot be deleted
  - Move: Move the message to SIM or phone
  - Copy: Copy the message to SIM or phone
  - Mark: single marker or markers in whole or in text

messages stored in SIM1/SIM2, mark or unmark after delete records

- Sort: In accordance with time / contact / theme / message type sort
- Add sender to: Add the sender to a new contact or an existing contact
- Delete repeated number: choose to delete the same number of records.
- Add to blacklist: Add the sender to blacklist

---

---

## **Outbox**

Reading or processing stored in the Outbox of the SIM card message.

## **Drafts**

Reading or processing stored in the Drafts of the SIM card message

## **Sentbox**

read and process the mail stored in the SIM card has been sent information

## **Templates**

Use the function of templates

## **Broadcast message**

Use the function of broadcast message

## **Voice mail server**

Use the function of voice mail server

---

---

## Services

### Internet

Use the function of internet

[Bookmark]: Website of interest can be saved in the bookmarks and the bookmarks can be edited or direct them to surf.

[History]: Mobile recently logged in the menu page is saved, you can directly select the records inside the surf

[Offline pages]: Throughout the course of mobile browsing, save the snapshot shown here

[Homepage]: Open the home page

[Settings]: Set account/homepage/content/restore default

[Exit]: Exit browser

### STK

Full name of the SIM card application tool kit (SIM Application Tool kit). It can provide you with flexible

---

---

information functions, such as stock information, traffic information, weather and so on. STK functionality provided by the network operator decision. The business needs the support of SIM cards and network

## **Ultrazone**

Connect to Ultrazone

## **Golife**

Please use the card

## **Application**

### **My files**

[Memory Card]: SD card needs to support T card

[New folder]: Create a new folder.

[Delete]: delete the specified folder.

[Details]: View the folder or file for more information

[Rename]: the selected folder or rename the file or copy

[Copy]: Copy to folder

---

[Search]: Enter the folder name to find out

[Sort]: By the way you choose to sort the files.

[Mark]: Select Mark / Unmark single / all

[Memory status]

- Memory Card capacity: View the memory card capacity
- Format Memory Card: Format memory card
- Rename memoryCard: Rename the memoryCard

## **Calculator**

Can be continuously mixed arithmetic, the operation is simple, practical, convenient

## **World clock**

View the time of countries

## **Bluetooth**

[Bluetooth]: Choose to activate the Bluetooth

[Bluetooth visibility]: Bluetooth visibility set

[Paired device]: Search and paired Bluetooth devices

---

[Device name]: Local Bluetooth name

[Bluetooth file storage]: Storage location

[Help]: Help Documentation

### **Zen store**

Connect to Zen store

### **Videozone**

Connect to Videozone

### **Games**

[Brick N Ball]:

Provide the Brick N Ball game

[Need of Speed]:

Provide the Need of Speed game

[Snake Cobra]

Provide the Snake Cobra game

---

---

## **FCC Statement**

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful

---

---

interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

### **SAR Information Statement**

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S.

---

Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. \* Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for

---

---

use at the ear is **1.120W/Kg** and when worn on the body, as described in this user guide, is

**0.701W/Kg**(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RFexposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on

FCC ID: **2AUMW-G3-BLK** Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. \* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

## **Body-worn Operation**

---

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance

of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.

Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
