

Features:

Low cost - Referring to other duplicator, yeah;
Charming shape- Suitable for handheld;
Colorful - A red button is special;
Check before send - Don't worry the quality issue!

Compatibility:

2260(all manufacturers), 2262(All manufacturers),
PT2264, 5326(All manufacturers), SC5262, HT600,
HT680, HT6207, HT6010, HT6012, HT6014, SMC918series,
527(All manufacturers), 1527(All manufacturers),
2240(All manufacturers) .

Note:

It can't copy original car remote control, two-way remote control and rolling code remote control
(Rolling code chips start with HCS commonly, such as HCS200, HCS201, HCS300, HCS301, etc.)

Instruction:

1.Clear Out Code:

Press the A button and B button at the same time, the LED indicator will enter into the fast flashing status, it means that all the memory data is cleared (Please see the video above). You can repeat the above operating steps if the memory clear operation is not successful.

2.Duplicating (Learning)/Face to Face Copying(One to One Copying):

After cleared the memory, you can operate Face to Face Copying(One to One Copying), your left hands press the original remote control and your right hands press the duplicating remote control at the same time; Put the two remote controls together as close as possible. For example, press the Button A of the 2 remote controls at the same time, the LED Indicator flashes fast, and you press the Button A of the duplicating remote control again, the LED indicator long light, it means that the original remote control of the A button A code has been copied into the duplicating remote control. The other 3 buttons are the same operation.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
