

We, the undersigned, attest the following:

The model number of the antenna used is 2JE 18. Gain figures are:

- At low band the peak gain is 1.2 dB.
- At high band the peak gain is 4.1 dB.

The antenna gain is therefore well below the module certification limits. As a result, no further RF Exposure assessment is required. Item 1.3 is specified as per KDB 996369 D04 – 3.0 HOST PRODUCT TESTING GUIDANCE.

Signed:

A handwritten signature in black ink, appearing to read "Ian Bartholomew".
