

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A red cable connects the analyzer to a power supply unit on the floor. The power supply is connected to a device under test (DUT) on a separate wooden table to the right. The background shows a plain wall with electrical outlets.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test chamber. The chamber is lined with white, square-shaped electromagnetic interference (EMI) absorbers. Inside the chamber, a device under test (DUT) is placed on a stand. A metal frame is positioned in front of the DUT. The floor of the chamber is marked with yellow and black diagonal stripes.
