(3) Bluetooth

FCC Warning

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

Warning: Changes or modifications to this unit not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

FCC Warning

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

Common Questions (FAQ)

Q: The Bluetooth scanner can not be connected to Android device?

A:

Please make sure that the Android system support for BTE, and it is recommended to use 5.0 or above.

Q: After being paired, the barcode can not be uploaded to device?

A: Please confirm the working mode of the scanner. If it is in GATT mode, it needs to receive data in APP. If it is in HID mode, barcode data can be output as long as the input method can be input.

Q: The device can not search the scanner?

A: 1. Make sure it is powered on.

2. Make sure the mobile version meets the requirement.

3. Confirm if the Bluetooth of the scanner is connected (the blue light is on), if connected, you need to disconnect the Bluetooth connection from the connected device and rescan.

Q: How to connect to the mobile again if the Bluetooth scanner has been connected to mobile?

A: Open the Bluetooth searching interface of the APP to connect to the corresponding Bluetooth device.

Q: If the data received in HID mode is different from the original data?

A: Confirm the current input method is an English keyboard, and turn off the English word mode, the English association and the initial capitalization mode (depending on the different input methods).
