

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph showing a small electronic component on a blue textured board. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters, with markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100. The component is positioned between the 40mm and 60mm marks. The component has a gold-colored connector and various markings, including '118 100' and '222'.</p>
<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph showing a different electronic component on a blue textured board. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters, with markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100. The component is positioned between the 40mm and 60mm marks. The component has a gold-colored connector and various markings, including 'HN-6258SR-BZ', '94V-0', 'L51', 'M2', 'M3', 'M4', and '1-202002-1'.</p>

<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph showing a small, rectangular printed circuit board (PCB) component. The board is populated with several surface-mount components, including two integrated circuits (ICs) and several resistors. The board is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 70 mm marks. The background is a blue, textured fabric.</p>
<p style="text-align: center;">Solder Board-Component View 7</p>	 <p>A photograph showing a blue cylindrical battery component. The battery is labeled with the following specifications: "BL 18650 2500mAh 3.7V" and "9.62Wh 202008". It is connected to a black cable with a white connector. The battery is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the battery positioned between the 10 mm and 90 mm marks. The background is a blue, textured fabric.</p>
