

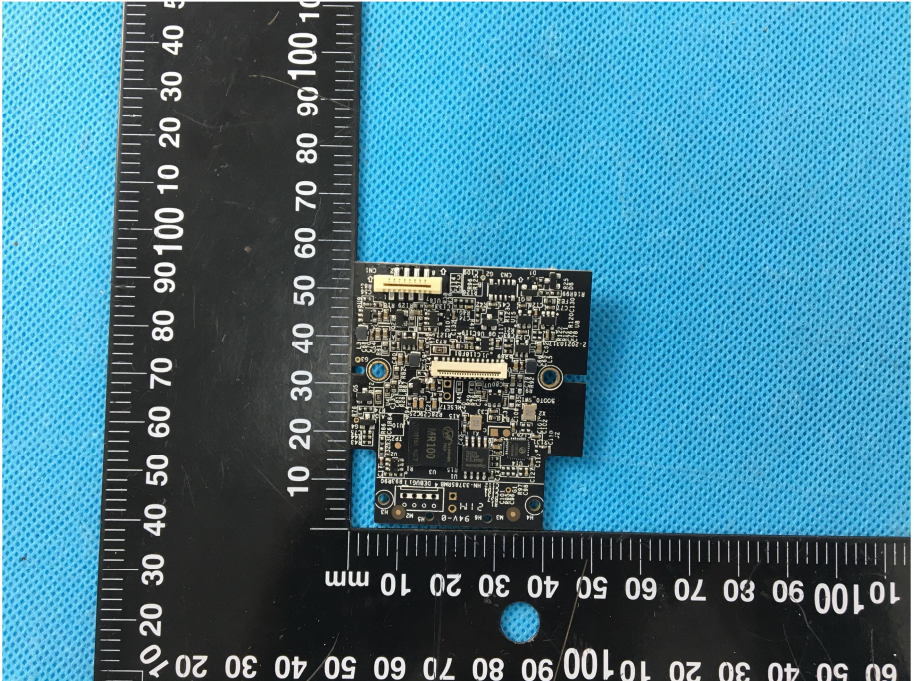

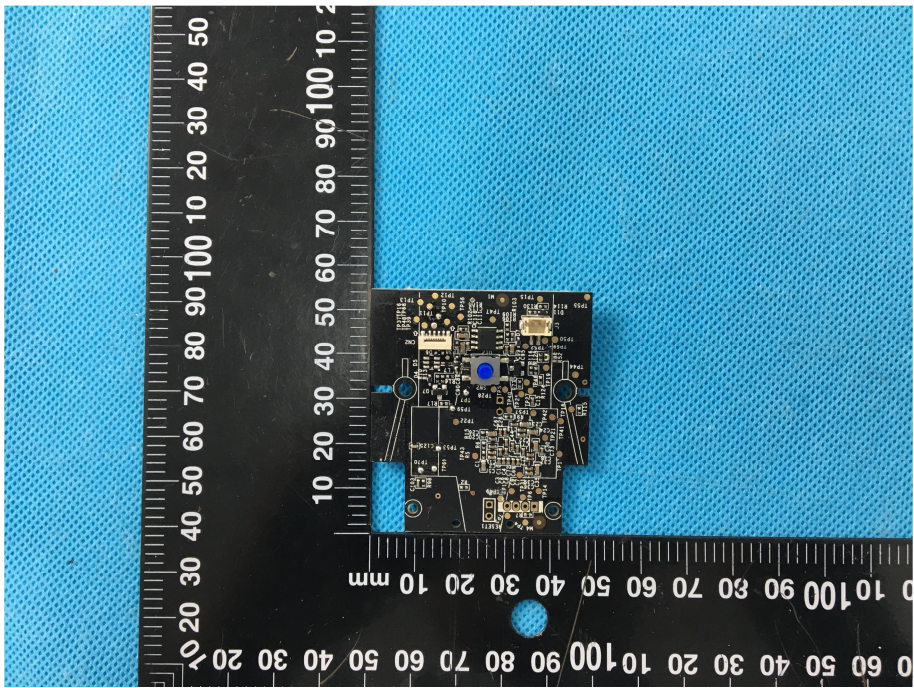

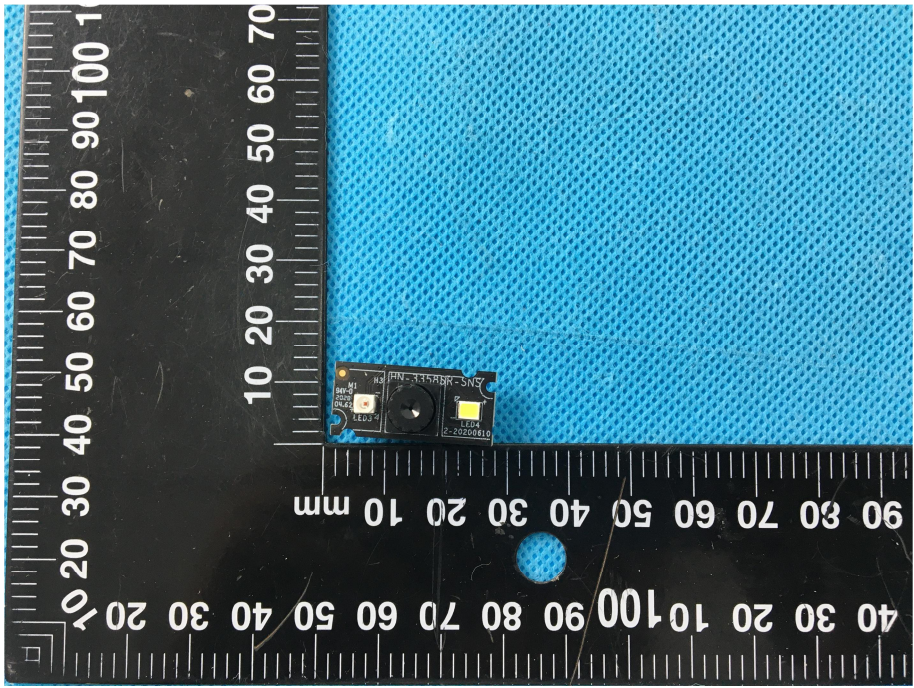

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View</p>	 A photograph showing the internal components of an EUT (Electronic Under Test) device. The black plastic housing is open, revealing a green printed circuit board (PCB) with various electronic components. A black ruler is placed vertically to the left of the device for scale, showing measurements in millimeters. The background is a blue textured surface.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the PCB components, specifically focusing on the solder joints and components. A black ruler is placed vertically to the left of the board for scale, showing measurements in millimeters. The background is a blue textured surface.

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a small, rectangular printed circuit board (PCB) component. The board is populated with various electronic components, including a central integrated circuit (IC), several resistors, and a blue electrolytic capacitor. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board's length is approximately 100 mm, and its width is approximately 40 mm.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a small, rectangular printed circuit board (PCB) component, similar to the one in View 2. This board features a prominent circular component, likely a lens or a sensor, in the center. It also has a yellow LED and other smaller components. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board's length is approximately 100 mm, and its width is approximately 40 mm.
