

<p style="text-align: center;"><b>Solder Board-Component View 4</b></p>	 A photograph showing a small blue printed circuit board (PCB) component. The component is rectangular and has two sets of gold-plated pins on its right side. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters from 0 to 100. The component's length is approximately 25 mm.
<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 A photograph showing a larger black PCB populated with various electronic components. The board is populated with a microcontroller, several integrated circuits, capacitors, and connectors. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board's length is approximately 100 mm.

<p style="text-align: center;"><b>Solder Board-Component View 6</b></p>	 <p>A photograph of a black printed circuit board (PCB) populated with numerous electronic components, including integrated circuits, resistors, and capacitors. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board's components are densely packed, and various part numbers and labels are visible on the surface.</p>
<p style="text-align: center;"><b>Solder Board-Component View 7</b></p>	 <p>A photograph of a smaller blue PCB component with several electronic components and a multi-colored ribbon cable. The component is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters from 0 to 100. The component has labels such as 'IT4-KEY', 'SM124V', 'H11', 'M1', 'J1', 'D3', and '2-201 60814'. The ribbon cable is connected to the component and extends towards the top right of the frame.</p>

<p style="text-align: center;"><b>Solder Board-Component View 8</b></p>	 A photograph showing a blue PCB component with a circular hole on the left and a notch on the right. Three wires (red, green, and blue) are soldered to the component. The component is placed on a black ruler with white markings in millimeters. The ruler shows the component is approximately 40mm long and 10mm wide. The background is a blue textured surface.
<p style="text-align: center;"><b>Solder Board-Component View 9</b></p>	 A photograph showing a blue PCB component with two circular holes. The component is labeled with "94V-0" and "2042". Two wires (red and black) are soldered to the component. The component is placed on a black ruler with white markings in millimeters. The ruler shows the component is approximately 40mm long and 10mm wide. The background is a blue textured surface.
