

YOGA40W00 FCC ID Label sample

FCC ID Label Location

Description on Adhesive and Adhesive process:

1. FCC label adhesive

material Adhesive type:

467MP -0.15mm

Make: 3M United Kingdom PLC

Specifications: This tape meets the requirements of U.S. Government specification MIL-P- 19834, Amendment 1, Type 1. 467MP is a UL and AGA recognized product.

Application: 467MP is well suited for bonding together a wide variety of similar and dissimilar materials such as metals, paints, wood, glass, and some plastics. An excellent adhesive for mounting nameplates.

2. Label addition process:

a) Bond strength is dependent upon the amount of adhesive-to surface contact developed. Firm application pressure develops better adhesive contact & thus improves bond strength.

b) To obtain optimum adhesion, the bonding surfaces must be clean, dry and well unified. A typical surface cleaning solvent is isopropyl alcohol & water.

Use proper safety precautions for handling solvents.

c) The ideal tape application temperature range is 21°C to 38°C (70°F to 100°F).
