External Labeling Request

To whom it may concern,

Based on the guidance of KDB 784784 D01, Section 3, Prevent Biometrics, has determined that external labeling on their product would not be practical based on the nature and usage of the product (the product is a mouth guard). Due to the nature and usage of the product, it is impracticable to put a label on the product.

The product is packaged in the Solo Case (small black charging case), then the cases are packaged into the pelican case. The labeling of the product on the pelican case is pictured below (green arrow pointed):

In addition, the labeling disclosure may also be found in the manual as pictured below:

If you see a blue or red LED light, make sure that the mouthguard is properly placed in the solo case, with teeth down and pushed all the way against the back wall.

TEAM CASE AUXILIARY CHARGING PORT

The team case includes an auxiliary USB charging port at the bottom of the case. The port is rated for 1A charging and can be used to charge a smartphone or tablet.

Sincerely,

Signature:
