### Welcome!

This phone was built for you...  
it's the first phone that pays you back. The more you use it, the more you make. It's that simple.

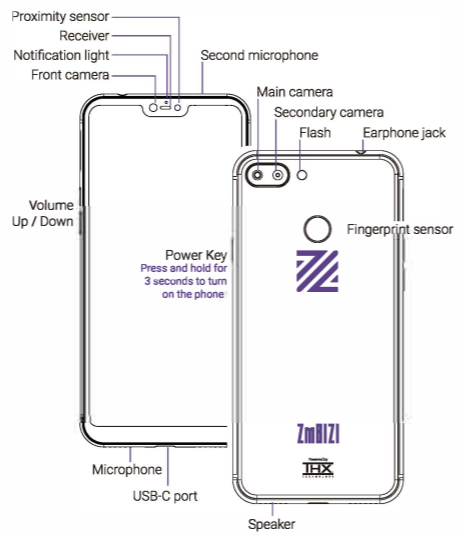

Thanks for taking this first step with us. We look forward to growing with you.

We are available anytime should you have any questions , comments or suggestions . Please contact us on [social@zmbizi.com](mailto:social@zmbizi.com)

Best wishes,  
Your Zmbizi Team

### Meet your new phone

### Before you start

#### Transfer data from an iPhone®

To bring all of your texts and data (like photos, music, contacts, and apps) to your new phone, turn off:

- iMessage®, FaceTime®, and Device Management (if needed) in your iPhone Settings
- iTunes® encryption in the iTunes app on your computer

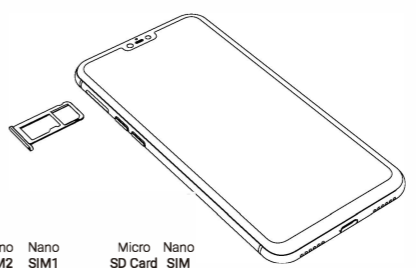

For iPhone help, go to [g.co/imessagehelp](http://g.co/imessagehelp) and [g.co/datatransferhelp](http://g.co/datatransferhelp)

#### Switching from Android or another phone

Go straight to setup. Or, follow the full transfer guide for your old phone at [g.co/datatransferhelp](http://g.co/datatransferhelp)

### Set up your new phone

Insert your SIM card from your carrier using the provided SIM tool.

Nano SIM2

or

Nano SIM1

or

Micro SD Card

or

Nano SIM

To turn on, press and hold the power button for 3 seconds. Follow the on-screen steps to setup.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Mobile Phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

#### FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Zmbizi Z1 (2AUYYV-ZMBIZI-Z1) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.491 W/kg and when properly worn on the body is 0.664 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10 mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

#### Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.

Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
