Trouble Shooting Guide:

Q1. Why my headset does not have sound?

A1. Microsoft Windows may be prohibiting your Bluetooth devices in Sound Settings. Go to Control Panel- Sound Setting, right click on any space to show all disabled devices. And in the Playback Tab, select Bluetooth Hand Free-Audio as the default device. Click OK. Next go to the Record Tab and select Bluetooth Audio Input Devise as the default devise, click OK.

FCC Declaration of Conformity

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
