## **FCC 47 CFR MPE REPORT**

# GUANGZHOU RANTION TECHNOLOGY CO., LTD.

DAC DIGITAL SPEAKER

Model Number: Rarity40

Additional Model: Rarity30

FCC ID: 2AV7NRARITY

| Applicant:               | GUANGZHOU RANTION TECHNOLOGY CO., LTD.                              |  |  |  |
|--------------------------|---|--|--|--|
| Address:                 | Room 432, Building 4, No. 50 Nanxiang 1st Road, Huangpu District,   |  |  |  |
|                          | Guangzhou, China  |  |  |  |
|                          |   |  |  |  |
| Prepared By:             | EST Technology Co., Ltd.  |  |  |  |
|                          | Chilingxiang, Qishantou, Santun, Houjie, Dongguan, Guangdong, China |  |  |  |
| Tel: 86-769-83081888-808 |   |  |  |  |

| Report Number:  | ESTE-R2201104               |  |  |
|-----------------|-----------------------------|--|--|
| Date of Test:   | Dec. 13, 2021~Jan. 11, 2022 |  |  |
| Date of Report: | Jan. 13, 2022               |  |  |

## **Maximum Permissible Exposure**

# 1. Applicable Standards

Systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess limit for maximum permissible exposure. In accordance with 47 CFR FCC Part 2 Subpart J, section 2.1091 this device has been defined as a mobile device whereby a distance of 0.2m normally can be maintained between the user and the device.

### 1.1. Limits for Maximum Permissible Exposure (MPE)

### (a) Limits for Occupational/Controlled Exposure

| Frequency  | Electric Field | Magnetic Field | Power Density (S) | Averaging Times        |
|------------|----------------|----------------|-------------------|------------------------|
| Range      | Strength (E)   | Strength (H)   | $(mW/cm^2)$       | $ E ^2$ , $ H ^2$ or S |
| (MHz)      | (V/m)          | (A/m)          |                   | (minutes)              |
| 0.3-3.0    | 614            | 1.63           | (100)*            | 6                      |
| 3.0-30     | 1842/f         | 4.89/f         | (900/f)*          | 6                      |
| 30-300     | 61.4           | 0.163          | 1.0               | 6                      |
| 300-1500   |                |                | F/300             | 6                      |
| 1500-10000 |                |                | 5                 | 6                      |

#### (b) Limits for General Population / Uncontrolled Exposure

| Frequency   | Electric Field | Magnetic Field | Power Density (S) | Averaging Times                  |
|-------------|----------------|----------------|-------------------|----------------------------------|
| Range (MHz) | Strength (E)   | Strength (H)   | $(mW/cm^2)$       | $ E ^{2},  H ^{2} \text{ or } S$ |
|             | (V/m)          | (A/m)          |                   | (minutes)                        |
| 0.3-1.34    | 614            | 1.63           | (100)*            | 30                               |
| 1.34-30     | 824/f          | 2.19/f         | (180/f)*          | 30                               |
| 30-300      | 27.5           | 0.073          | 0.2               | 30                               |
| 300-1500    |                |                | F/1500            | 30                               |
| 1500-10000  |                |                | 1.0               | 30                               |

Note: f=frequency in MHz; \*Plane-wave equivalent power density

#### 1.2. MPE Calculation Method

$$E (V/m) = \frac{\sqrt{30 \times P \times G}}{d}$$
 Power Density: Pd  $(W/m^2) = \frac{E^2}{377}$ 

E = Electric Field (V/m)

P = Peak RF output Power (W)

G = EUT Antenna numeric gain (numeric)

d = Separation distance between radiator and human body (m)

The formula can be changed to

$$Pd = \frac{30 \times P \times G}{377 \times d^2}$$

From the peak EUT RF output power, the minimum mobile separation distance, d=0.2m, as well as the gain of the used antenna, the RF power density can be obtained

# 2. Conducted Power Result

| Mode   | Frequency | Peak output power | Peak output | Target power | Antenna gain |          |
|--------|-----------|-------------------|-------------|--------------|--------------|----------|
| Wiode  | (MHz)     | (dBm)             | power (mW)  | (dBm)        | (dBi)        | (Linear) |
| GFSK   | 2402      | 7.06              | 5.08        | 7±1          | -2           | 0.631    |
|        | 2441      | 6.98              | 4.99        | 7±1          | -2           | 0.631    |
|        | 2480      | 7.08              | 5.11        | 7±1          | -2           | 0.631    |
| 8-DPSK | 2402      | 9.94              | 9.86        | 10±1         | -2           | 0.631    |
|        | 2441      | 9.95              | 9.89        | 10±1         | -2           | 0.631    |
|        | 2480      | 10.06             | 10.14       | 10±1         | -2           | 0.631    |

# 3. Calculated Result and Limit

| Mode      | Target power (dBm) | Antenn<br>(dBi) | na gain<br>(Linear) | (S)     | Limited of Power Density (S) (mW/cm <sup>2</sup> ) | Test Result |  |
|-----------|--------------------|-----------------|---------------------|---------|--|-------------|--|
| 2.4G Band |                    |                 |                     |         |  |             |  |
| GFSK      | 8                  | -2              | 0.631               | 0.00079 | 1  | Complies    |  |
| 8-DPSK    | 11                 | -2              | 0.631               | 0.00158 | 1  | Complies    |  |

## **End of Test Report**
