► Connecting Your Socket with APP

A. Easy Mode (Recommend)

1. Please make sure the mini socket has connected with electricity at the beginning, then open the "Smart Life" APP, tap the "ADD DEVICES" or the "+" at the upper right corner of the page and select "Electrical outlet;"

2. long press on/off button of the device for 5 seconds until indicator light quickly flashed, the interface page already stepped into "Add Device" Page as the above;
3. Make sure the indicator light is flashing rapidly and confirm it in app;
4. Choose the local WIFI and enter the correct password and confirm;
5. Wait for configuring successfully, then tap "Done".

B. AP Mode

1. Please change to "AP Mode" if connecting failed in "Easy Mode". The AP Mode is at the upper right corner of the "ADD DEVICE" page.
2. Long press on/off button until the indicator light flashes slowly;
3. Make sure the indicator light is flashing slowly and confirm it in App;
4. Choose the local WIFI and enter the correct password and confirm;

5. Tap "Connect Now", choose WIFI hotspot named "SmartLife xxx", then back to "Smart Life" application;
6. Wait for configuring successfully, then tap "Done".

Getting to Know "Smart Life" APP

A. Devices

You can add listed devices by tap the "+" at the top right at this page.

1. Switches

Switches allows you to turn on/off your device anywhere. As long as you have an internet connection you can control the device in your home.

Tap to the icon at the upper right of the page, you are able to modify the device name or even create a group (If you have several device), which means you can turn multiple devices on or off at the same time.

2. Timer

You can set the devices on or off after the specific time as you want with this function.

3. Countdown

With the count down timer feature, you can automatically switches on/off the running household appliances.

4. Statistics

You can check the real-time and historical power consumption here if your device is built with energy monitoring function.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

This equipment should be installed and operated with minimum distance 20cm between the radiator&your body.
