# Safety Information

The following information is for your safety only.

- Wash or expose your mobile phone to various liquids
- Use your device in high humidity conditions for a long period.
- Drop, throw or bend your phone.
- Use harsh chemicals, cleaning solvents or aerosols to clean your phone.
- $\rightarrow$  In such a case, to clean, only use a soft, lint-free cloth and avoid excessive wiping, remember to unplug all power sources, devices, and cables.
- Dispose of your old device in typical trash containers. Instead, follow local regulations on how to dispose of electronic products.
- · Allow your pet to use your device as a toy and bite into it as it may cause electric shock or fire. Set the volume too high as it may cause hearing injuries.
- Use your device near a gas station as it may cause sparks that may cause a possibility of fire.
- Use the device if the device overheats and feels too warm. In such a case, turn off your device. Let it cool before using it again.

- prolonged period of time, as the overheated device may cause battery issues, fire or explosion.
- use for a prolonged period of time.
- use.
- can cause iniurv to skin.
- provided with your device.
- cable pins are damaged.
- may interfere with its function.

Safety for Children:

Keep your phone and its accessories away from the reach of small children. Do not allow children to play with the phone, its parts or accessories, because they can injure themselves or others. Your phone contains small parts and sharp edges which can detach and become a safety hazard for children, including a choking hazard. Seek immediate medical attention if an accessory, part, or battery is swallowed.

### Transportation Safety Warning:

- Please observe all transportation laws and regulations, DO NOT TEXT AND DRIVE.
- Do not use your device at a gas station, near fuels or chemicals where there is a risk of fire and/or explosion.
- On an aircraft, using electronic devices may interfere with the aircraft's electronic navigational instruments. Make sure the device is turned off during takeoff and landing.
- · Use caution when making calls in heavy traffic or hazard ous weather conditions such as rain, sleet, snow, ice, and heavy traffic.

local regulations.

#### 07

- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Only use an authorized service provider to replace the battery.
- Promptly dispose of phone in accordance with the local regulations.
- Avoid dropping the phone. If the phone is dropped, especially on a hard surface, and the user suspects damage to the phone, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazard.

#### Take extra precautions:

• Do not disassemble or open, crush, bend or deform, puncture or shred.

This phone contains a Lithium-ion polymer battery.

Improper handling of the battery pack may present a

risk of fire and burns. Do not attempt to open the

battery pack yourself. Do not disassemble, crush,

puncture, short-circuit the external contacts, dispose

of in fire or water, or expose the battery pack to

temperatures higher than 131°F (55°C). To replace

the battery, take the device to an authorized service

center. Recycle or dispose of the device according to

- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery with the charging system that has been qualified per CTIA Certification Requirements for Battery System Compliance to IEEE 1725. Use of an ungualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna.	Note: Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.	During SAR testing, this device was set to transmit a its highest certified power level in all tested frequence bands, and placed in positions that simulate R exposure in usage against the head with no separation and near the body with the separation of 10 mm. Although the SAR is determined at the highest certifie power level, the actual SAR level of the device whit operating can be well below the maximum value. Th is because the phone is designed to operate at multipl power levels so as to use only the power required the reach the network. In general, the closer you are to wireless base station antenna, the lower the power output. The exposure standard for wireless devices is based of a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. This device has received a grant of FCC Equipment Approval confirming that this model phone has bee evaluated as in compliance with all relevant SAR leve and the FCC RF exposure guidelines. SAR informatic on this model phone is on file with the FCC and can be found at www.fcc.gov/cet/ea/fccid after searching of FCC LD: 2AVD3V350S.	<ul> <li>A separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your body to ensure RF exposure level compliant with or lower than the reported level. To d support body-worn operation, choose belt clips or e holsters, which do not contain metallic components, to maintain a separation of 1 0 mm between this device and your body.</li> <li>RF exposure compliance with any body-worn accessory that contains metal was not tested and certified. The use of such body-worn accessories should be avoided.</li> </ul>	humming, or whining noise. So more immune than others to and phones also vary in the they generate. It is features of this phone locations, using your lant, to determine if you Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult

your service provider or phone retailer.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Your phone meets the M4/T3 level rating. Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. For more information about FCC Hearing Aid Compatibility, please go to http://www.fcc.gov/cgb/dro.
