

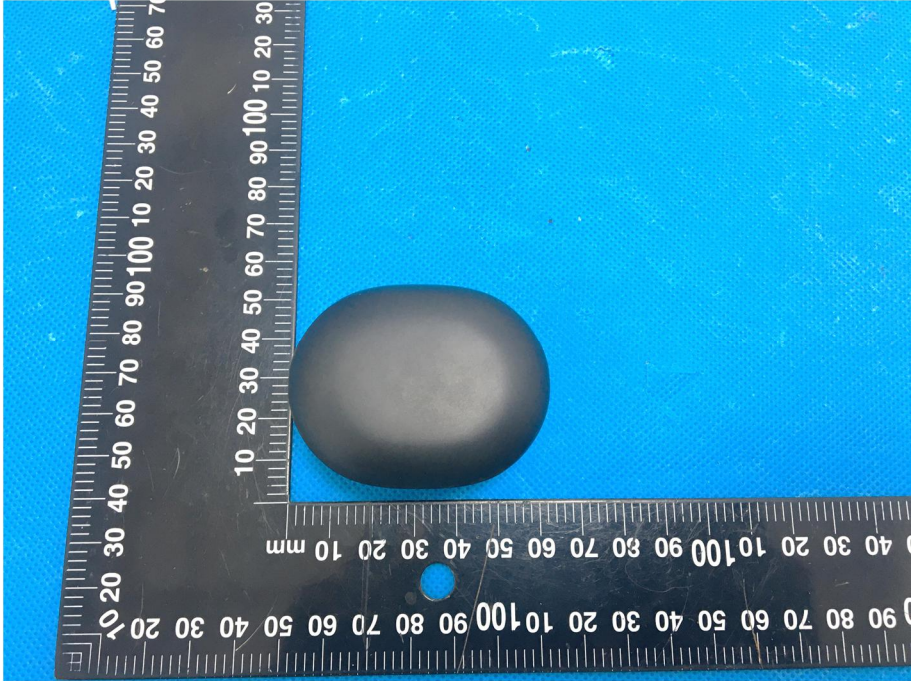

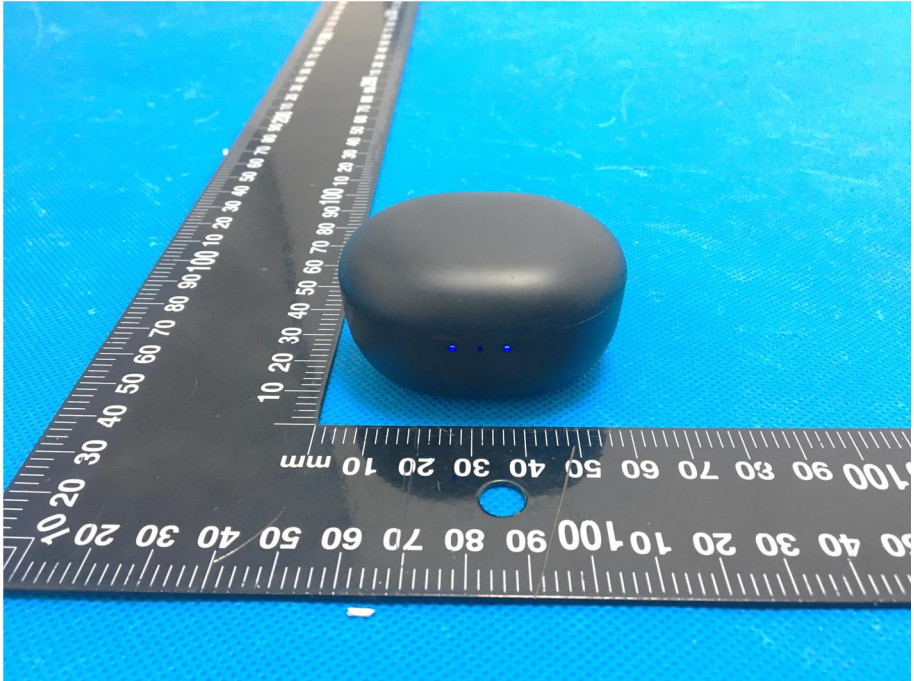

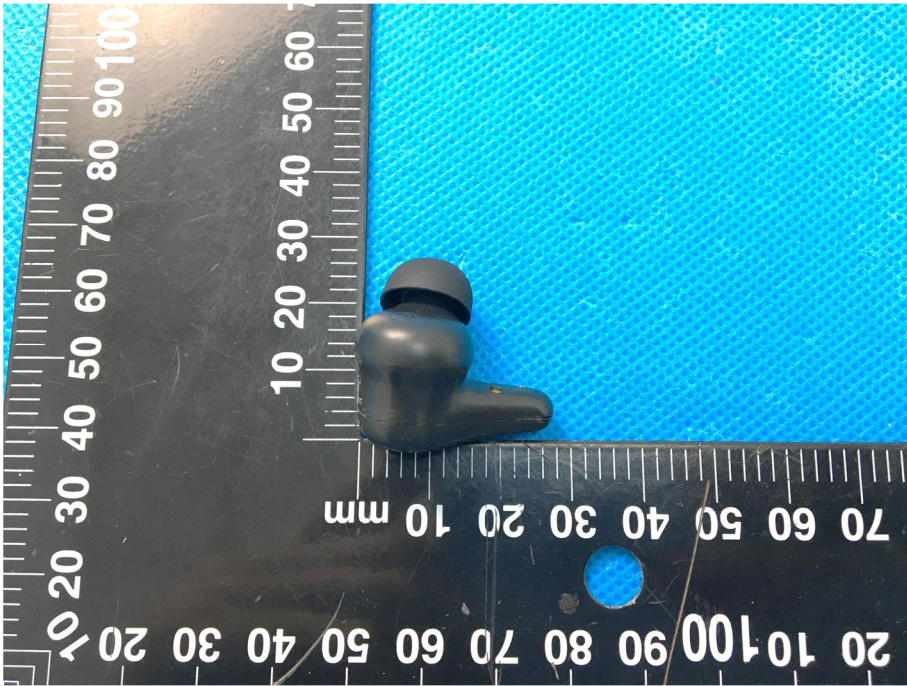

EXHIBIT 2 - EUT EXTERNAL PHOTOGRAPHS

<p>EUT View 1</p>	 A photograph showing a black, dome-shaped electronic component (EUT) resting on a blue textured surface. A black L-shaped ruler is placed next to the component for scale. The ruler has white markings in millimeters and centimeters. The component is roughly spherical and appears to be made of a matte black material.
<p>EUT View 2</p>	 A photograph showing the same black, dome-shaped electronic component from a slightly different angle. The component is positioned on the blue textured surface. The black L-shaped ruler is again present for scale. In this view, two small, bright blue LEDs are visible on the side of the component, near the base of the dome.

<p>EUT View 5</p>	
<p>EUT View 6</p>	

<p>EUT View 7</p>	 A photograph showing a small, black, L-shaped electronic component. The component is positioned on a black ruler with white markings. The ruler has two scales: a vertical scale on the left and a horizontal scale at the bottom. The vertical scale is marked from 0 to 100 in increments of 10. The horizontal scale is marked from 0 to 100 in increments of 10. The component is located between the 10 and 20 marks on the vertical scale and between the 30 and 40 marks on the horizontal scale. The background is a blue textured surface.
<p>EUT View 8</p>	 A photograph showing the same black electronic component from a different angle. The component is positioned on the same black ruler with white markings. The vertical scale on the left is marked from 0 to 100 in increments of 10. The horizontal scale at the bottom is marked from 0 to 100 in increments of 10. The component is located between the 10 and 20 marks on the vertical scale and between the 30 and 40 marks on the horizontal scale. The background is a blue textured surface.
