

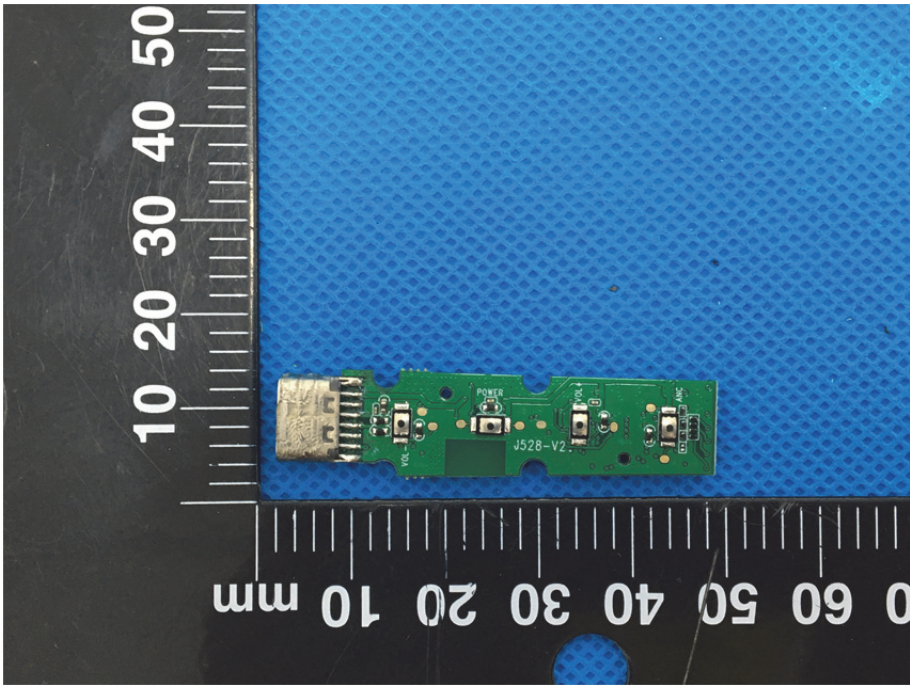

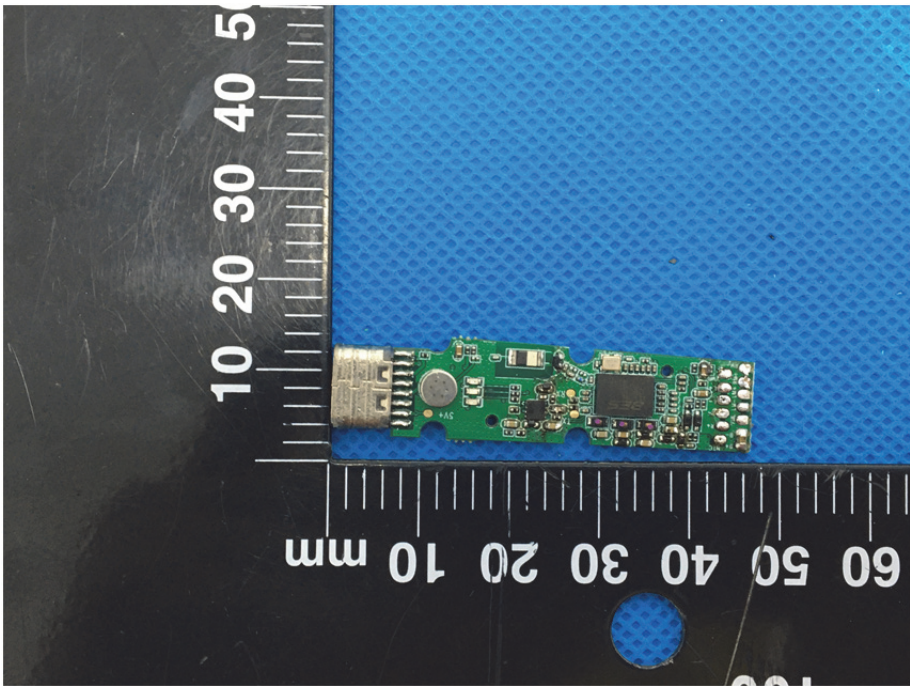

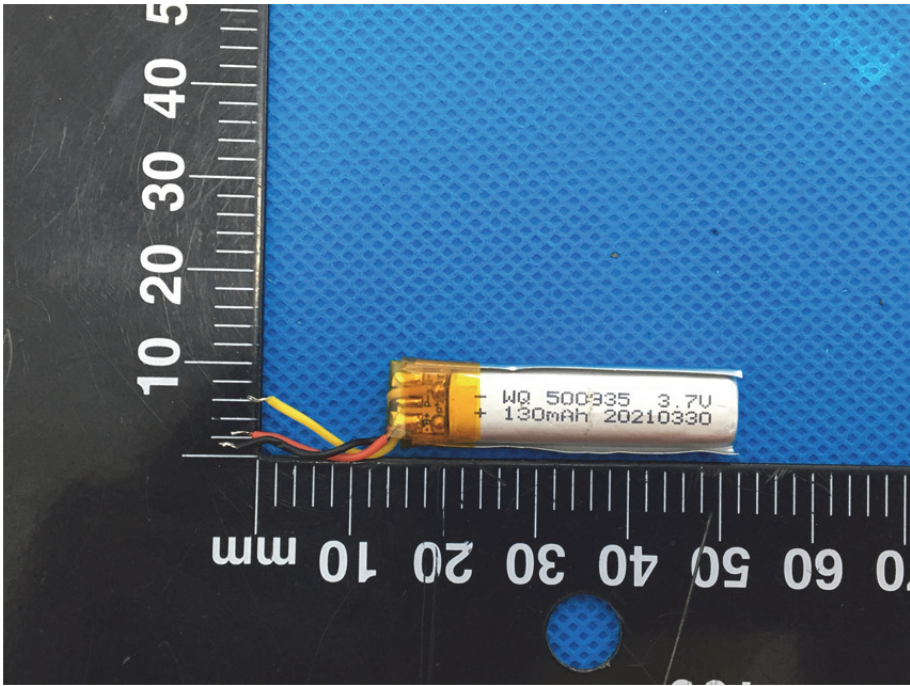

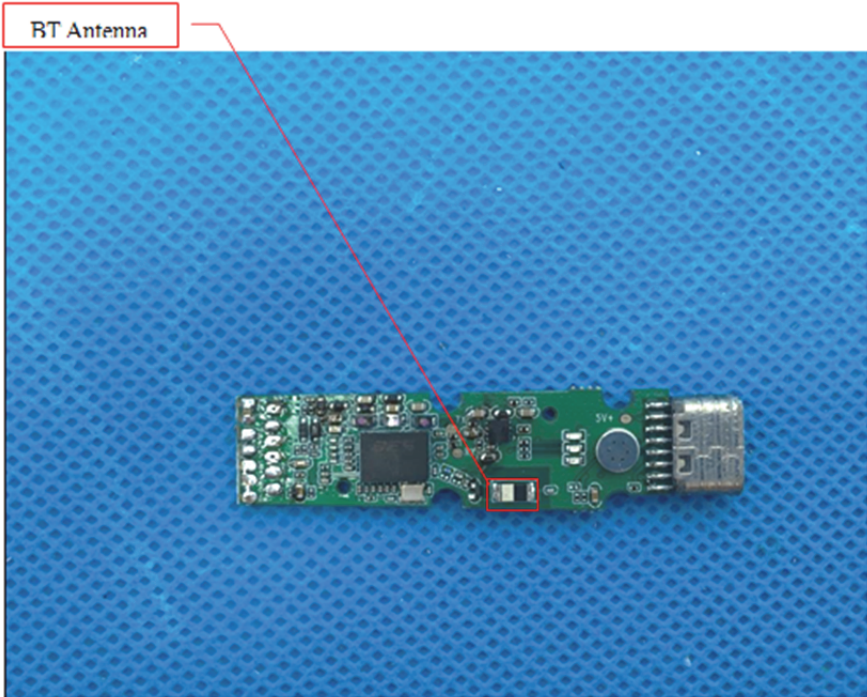

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of an EUT (Earpiece Unit Test) device. A black plastic housing with three circular openings is placed next to a green printed circuit board (PCB) with various electronic components. A black cable with an earpiece is also visible. A ruler is placed below the components for scale, showing measurements in millimeters.
<p>EUT Housing and Board View 2</p>	 A photograph showing the internal components of an EUT device from a different perspective. The black plastic housing is shown with the green PCB and the black cable with the earpiece. A ruler is placed below the components for scale, showing measurements in millimeters.

<p style="text-align: center;">Solder Board-Component View 1</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'J528-V2', positioned horizontally. The component features a USB connector on the left side and several surface-mounted components, including a microchip and various capacitors. The board is placed on a blue textured background. A black ruler with white markings is visible on the left and bottom edges, showing measurements in millimeters (10, 20, 30, 40, 50 mm).
<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of the same green PCB component, labeled 'J528-V2', from a different perspective. This view shows the underside of the board, revealing the solder joints and the reverse side of the components. The component is placed on a blue textured background. A black ruler with white markings is visible on the left and bottom edges, showing measurements in millimeters (10, 20, 30, 40, 50 mm).

<p>Solder Board-Component View 3</p>	 <p>A photograph showing a cylindrical lithium-ion battery with a white label and gold-colored terminals. The label contains the text: "WQ 500935 3.7V" and "130mAh 20210330". The battery is connected to three wires (yellow, red, and black) which are soldered to a black PCB. A black ruler with white markings is placed below the battery for scale, showing measurements in millimeters. The background is a blue textured surface.</p>
<p>Antenna View</p>	 <p>A photograph of a green PCB with various electronic components. A red box highlights a small component on the board, which is identified by a red line pointing to a label "BT Antenna" in a red box at the top left of the image. The PCB also features a USB connector on the right side. The background is a blue textured surface.</p>
