

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

**Conducted Emission
Test Setup**

**Radiation Emission Test
Setup (Below 30MHz)**

<p>Radiation Emission Test Setup (30MHz to 1GHz)</p>	A photograph of an anechoic chamber for a radiation emission test. The walls are covered with white, square-shaped pyramidal absorbers. In the center, a white, rectangular test table is mounted on a circular turntable. To the left, a metal frame structure with several vertical poles is visible. The floor is grey concrete with yellow and black safety stripes.
<p>Radiation Emission Test Setup (1GHz to 18GHz)</p>	A photograph of an anechoic chamber for a radiation emission test. The walls are covered with white, square-shaped pyramidal absorbers. In the center, a white, rectangular test table is mounted on a circular turntable. A white, rectangular object is placed on the table. To the right, a red, conical object is visible. The floor is grey concrete with yellow and black safety stripes.

Radiation Emission Test Setup (Above 18GHz)
