

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

**Conducted Emission
Test Setup**

**Radiation Emission Test
Setup (Below 30MHz)**

<p>Radiation Emission Test Setup (30MHz to 1GHz)</p>	<p>A photograph of an anechoic chamber for a radiation emission test. The chamber walls are covered with white, square-shaped pyramidal absorbers. In the center, a white, rectangular test table is mounted on a circular base. To the left, a metal structure with several vertical poles is visible. The floor is grey with yellow safety lines.</p>
<p>Radiation Emission Test Setup (1GHz to 18GHz)</p>	<p>A photograph of an anechoic chamber for a radiation emission test. The chamber walls are covered with white, square-shaped pyramidal absorbers. In the center, a white, rectangular test table is mounted on a circular base. A red object is visible in the foreground on the right. The floor is grey with yellow safety lines.</p>

Radiation Emission Test Setup (Above 18GHz)
