- Input port: USB Type-C
- Operating temperature: 0°C to +40°C

Components

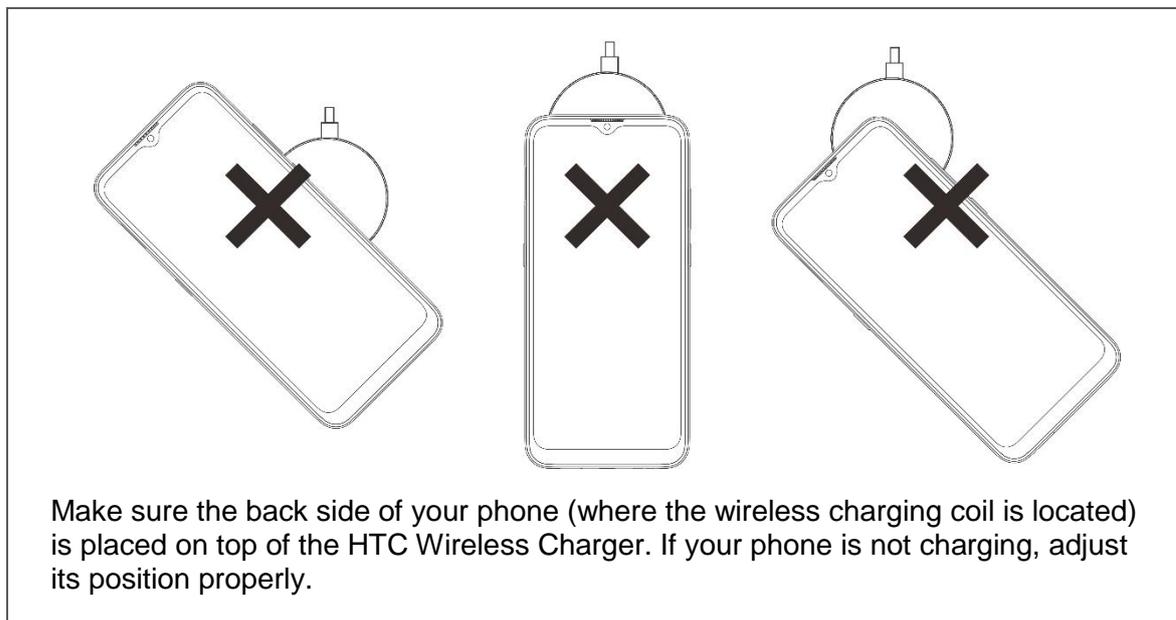

Charging your phone with the HTC Wireless Charger

Use the supplied USB Type-C cable to connect a power adapter (not included) to the HTC Wireless Charger. Plug in your power adapter to an outlet.

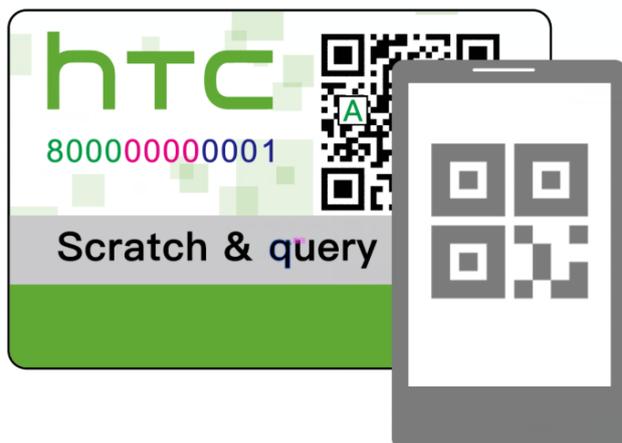

Place your Qi-compatible phone on top of the HTC Wireless Charger. Your phone will vibrate and charging will start automatically.

Make sure the back side of your phone (where the wireless charging coil is located) is placed on top of the HTC Wireless Charger. If your phone is not charging, adjust its position properly.

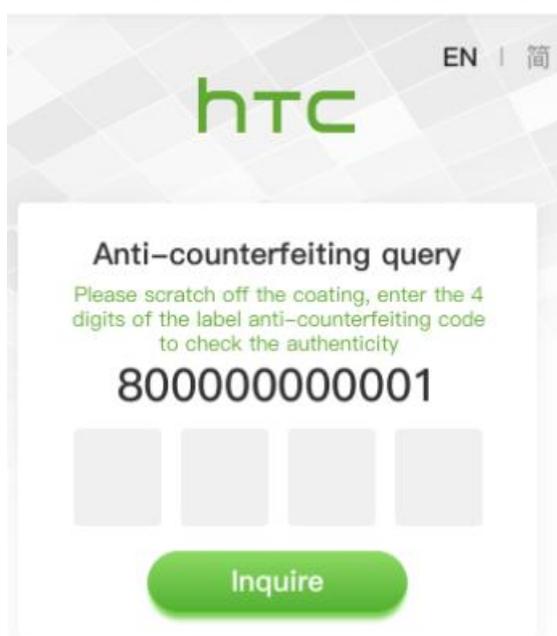

Note: The wireless charger stops charging when it overheats. After cooling down to a certain temperature, it will automatically resume charging.

Checking product authenticity

1. Scan the QR code on the package with your phone.
2. Scratch off the coating. You'll then see a code.

X HTC Digital product anti-counterfeit...

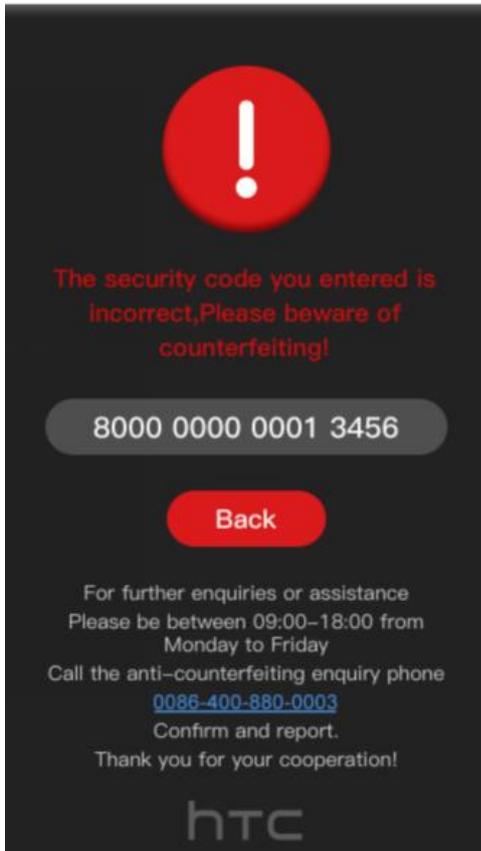

3. On your phone, enter the last four digits of the code.

X HTC Digital product anti-counterfeit...

4. If the code is authentic, the Search results screen will show that you have a genuine product code.

✕ HTC Digital product anti-counterfeit..

Warning: If you see the above screen, beware of counterfeiting.
