

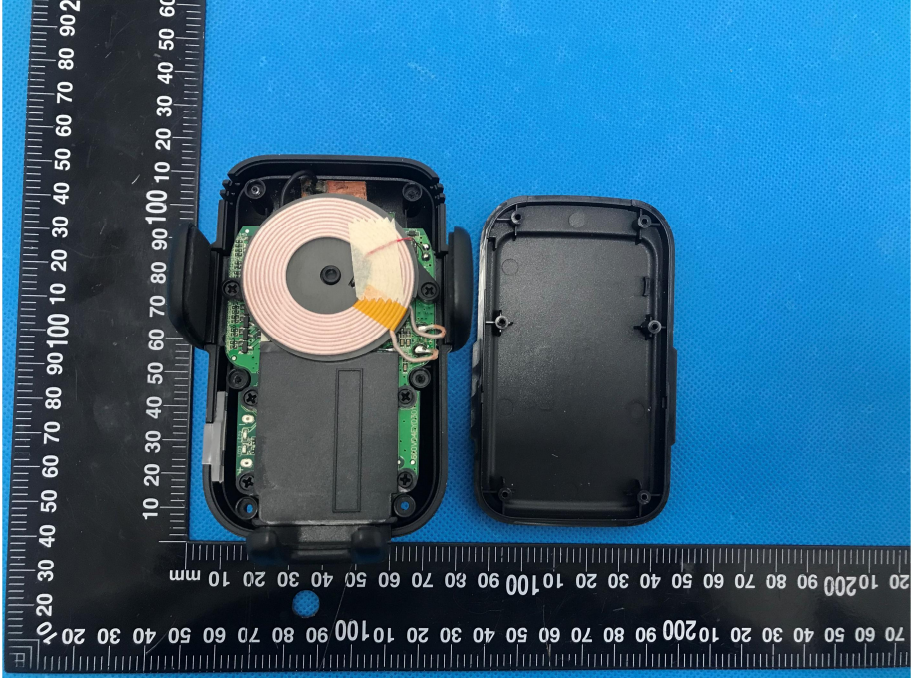

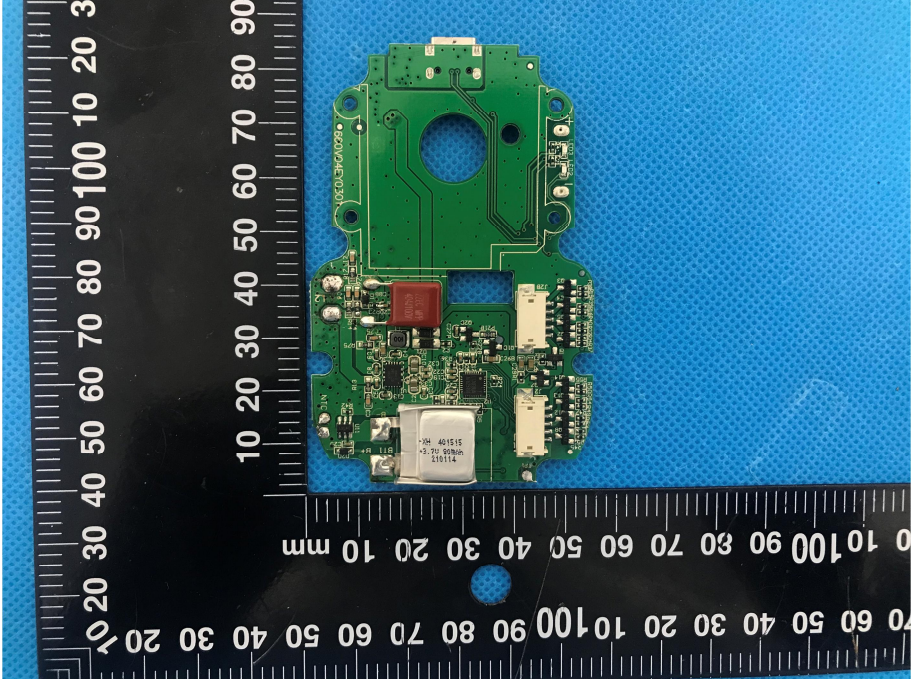

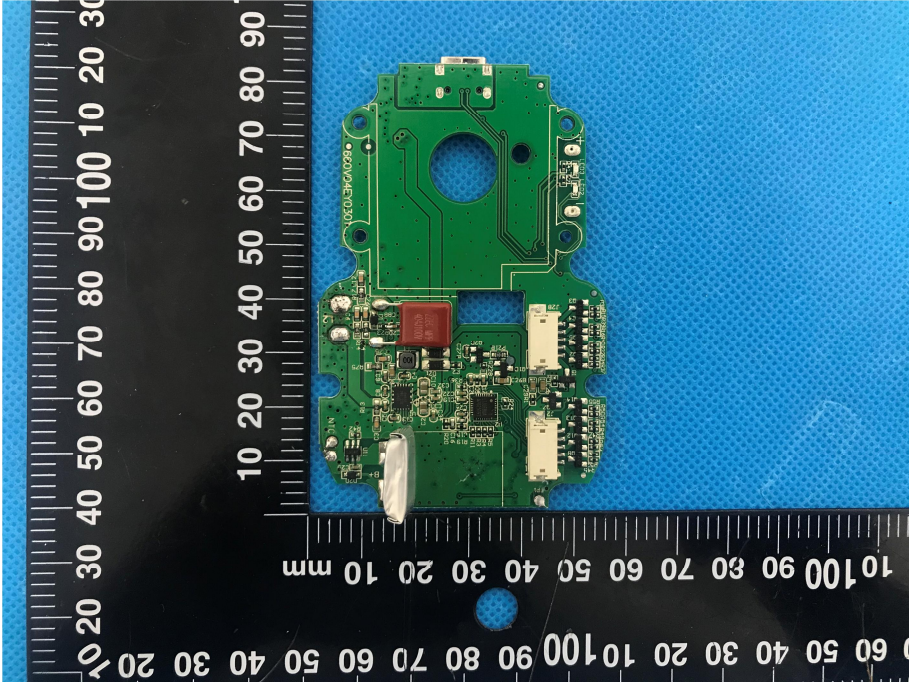

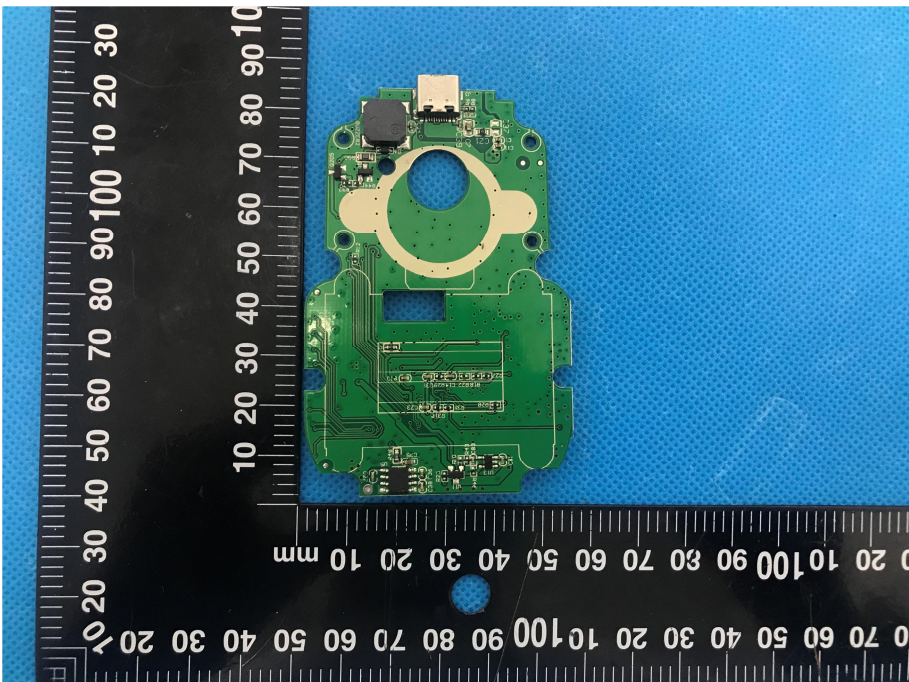

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 <p>This photograph shows the internal components of the EUT housing. The black plastic housing is open, revealing a green printed circuit board (PCB) with various electronic components. A prominent feature is a large, circular, multi-layered component, likely a speaker or a microphone, mounted on the board. A black battery is also visible. A black ruler is placed horizontally below the housing for scale, showing measurements in millimeters.</p>
<p><b>Solder Board-Component View 1</b></p>	 <p>This photograph provides a close-up view of the PCB components. The green PCB is populated with various electronic components, including a large silver component (likely a capacitor or inductor), a red component, and several smaller components. A black ruler is placed horizontally below the PCB for scale, showing measurements in millimeters.</p>

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The board is irregularly shaped with a large circular cutout in the center. It is populated with various electronic components, including a prominent red component, several integrated circuits, and surface-mount components. The board is placed on a blue textured background. A black ruler with white markings is positioned around the board to provide scale, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.</p>
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph of the same green PCB component, labeled 'Solder Board-Component View 3'. This view shows the reverse side of the board, which is mostly empty except for a large circular copper pad in the center, corresponding to the cutout in the top view. Some components are visible on the bottom edge. The board is placed on a blue textured background. A black ruler with white markings is positioned around the board to provide scale, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.</p>
