

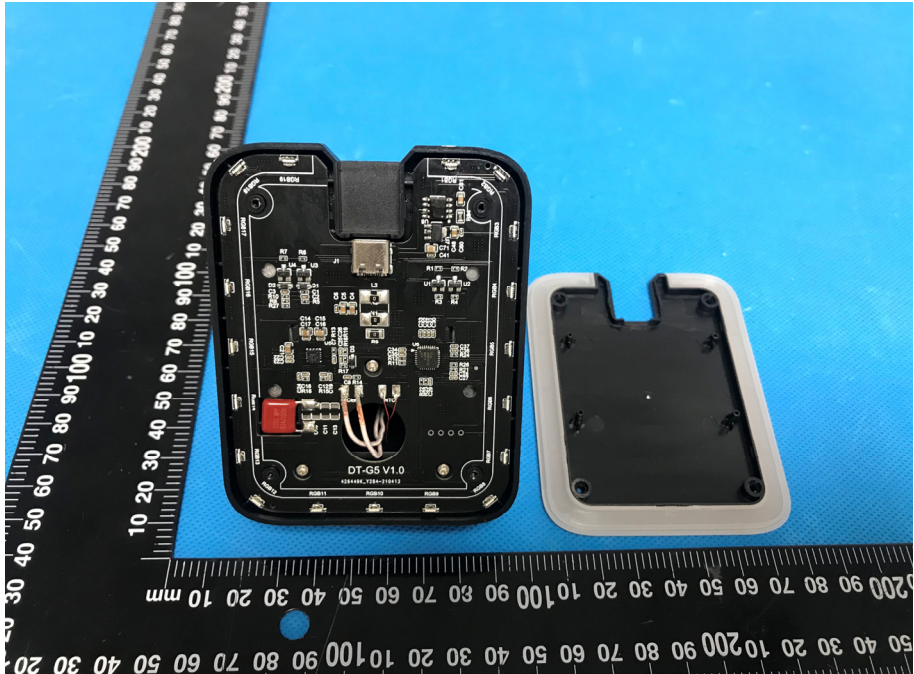

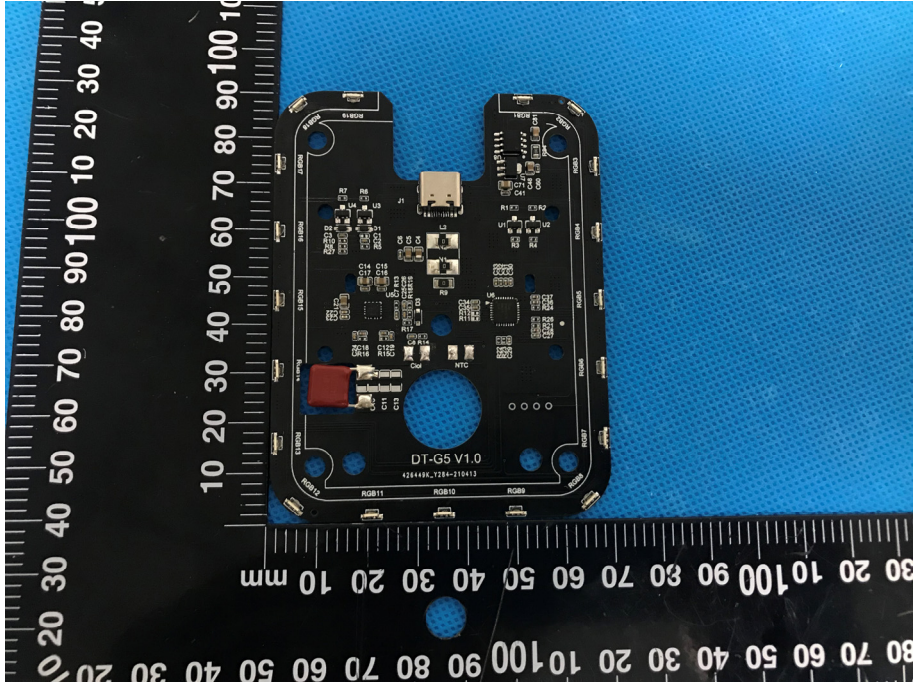

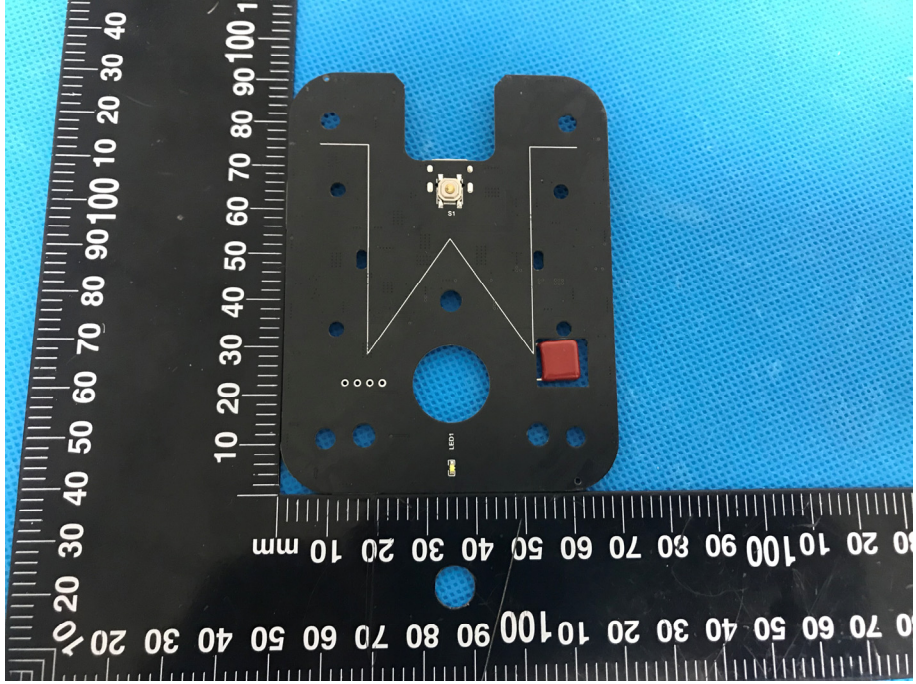

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>This photograph shows the internal components of the EUT. On the left is a black printed circuit board (PCB) populated with various electronic components, including a microcontroller, capacitors, and a red battery. The board is labeled 'DT-GS V1.0' and '420448L-7360-118112'. To the right of the board is a black plastic housing with a white inner lining. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.</p>
<p>EUT Housing and Board View 2</p>	 <p>This photograph shows the internal components of the EUT from a different perspective. On the left is a black plastic housing with a circular flexible display assembly mounted inside. The display is white with yellow conductive traces. To the right is a black plastic housing with a white inner lining. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.</p>

<p style="text-align: center;">Solder Board-Component View 1</p>	 A photograph of a black PCB with various components soldered onto it. The board is labeled "DT-G5 V1.0" and "4284446_1284-210413". It features a USB port, several integrated circuits, resistors, and capacitors. A red component is visible on the left side. The board is placed on a blue textured surface with a black ruler for scale.
<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of the same black PCB from a different perspective. This view shows the underside of the board, highlighting the solder joints and the placement of components like the red component and a central component. The board is placed on a blue textured surface with a black ruler for scale.
