Selpic

Contents

Notifications:

This product supports the inputting and printing of following contents: text, time, serial number, QR code, barcode, picture and weight information.

There are two operation interfaces on this APP, namely editing interface and print preview interface. On the editing/printing interface, you can edit the printing contents & set format, content placement and spacing. You can switch between two interfaces by clicking the semicircle button below the central. When the left/right of semicircle shows blue, it means that the present interface is respectively editing/print preview interface.

1. Wi-Fi Connection

Turn on the power of device to search for WI-FI (start with 'SELPIC', followed by a unique ID number, such as 'SELPIC0001'), then click it to connect, the initial password is 12345678. After connection, open the App on the mobile phone, if the WI-FI icon turns blue, it means the device is connected to the printer; if it stays gray, it means the connection fails. After the device is successfully connected, you are able to input the contents you want to print, the App will transfer the information to the printer.

2. Text Editing and Printing

1 Text Editing

Click the ⊤ on the top left corner to enter into the text printing surface, you can input the textual content, select the text font, size, and also set the text italic, bold, underline, strike through and other text effects. If you don't need to preview the print layout, you can click the on the bottom right corner to print.
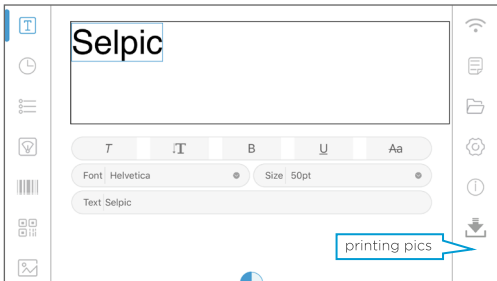

2 Adjustment of the Layout of Printing Text

After finishing the text editing, click the semicircle button on the bottom of interface to switch to the print preview interface, available to increase or reduce the text spacing, also able to rotate at 90 degrees clockwise and 90 degrees anticlockwise. You can also adjust the text content placement, and do other operations to text contents like deleting, mirroring, copying, reversing, rotating, etc,. The result can be checked in the Print Preview Area. Then click the Download Button to print the content.
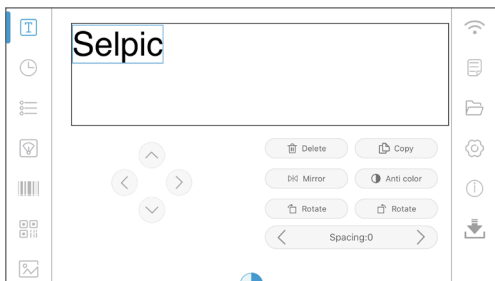

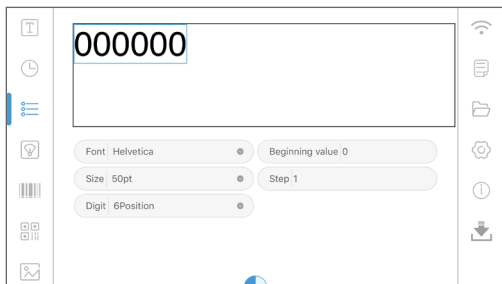

3. Printing Time

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
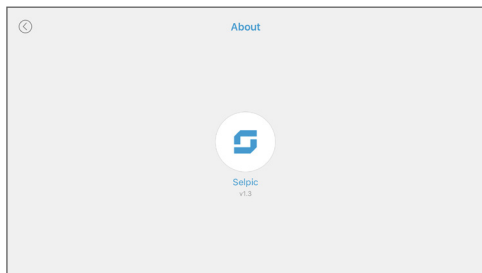

(2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

IC Warning

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) This device may not cause interference, and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
(1) l'appareil ne doit pas produire de brouillage, et
  (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
L'appareil a été évalué pour répondre aux exigences générales d'exposition aux RF. L'appareil peut être utilisé dans une condition d'exposition portable sans restriction.
