HANDING A COMPACT DISC

- Always protect a disc against scratches, soil , dust and etc. If a disc is treated with reasonable care, wiping off the disc with a soft cloth should be the only maintenance needed to retain its excellent sound reproduction. Discs should be retained in their original case during periods of non-use.
- Handle a disc only by its edges, Do not touch the surface or rainbow-colored side of the disc
- Handle a disc as shown in the illustrations in this section
- Use a soft cloth to wipe a disc clean. Do not use benzene, thinner, or other chemical cleaners to clean the disc as damage may result. A disc should always be wiped in a straight line from its center to its edge. Never wipe a disc in a circular motion.
- Do not expose a disc to direct sunlight, high humidity, or high temperatures for extended periods of time. Do not place the Disc on other equipment or near any heat source.
- Dust on the pickup lens can lead to erratic operation and interruption of the sound during play. To clean the pickup lens, open the disc compartment and blow the dust off . Using a camera lens blower(available at most camera stores)
- Note: Do not touch the surface of the lens. Do not allow any liquids on the inside of the product.
- To clean the CD player cabinet, use a soft and damp cloth to wire off the exterior surface.
- Never use benzol, benzene, or other strong chemical cleaners, as these could damage the finish.

DO:

DO NOT:

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

－－ Reorient or relocate the receiving antenna.

－－ Increase the separation between the equipment and receiver.

－－ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. －－ Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20Cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter
