

## Interface Introduction

---

### **Windows™ 10 S Start Menu**

You will see many applications fixed on the Start menu. These apps are displayed in the form of magnets, allowing you to easily visit programs at the click of a button. You will need to log in to your Microsoft™ account before the applications can fully run.

## Windows™ 10 in S Mode

---

### Microsoft™-Verified Security

With Windows™ 10 in S mode, your favorite applications, such as Office, Evernote and Spotify are available from the Microsoft™ Store where they're Microsoft™-verified for security. Feel secure when you're online. Microsoft Edge™ your default browser, gives you more protection against phishing and socially-engineered malware than Chrome or Firefox.

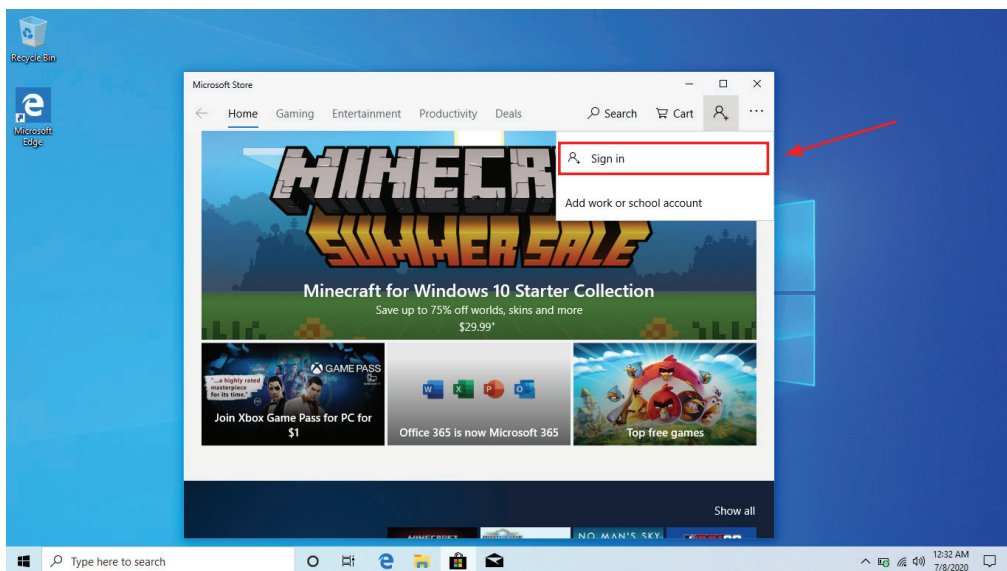

### Switching out of S Mode

Windows™ 10 in S mode is designed for security and performance, exclusively running apps from the Microsoft™ Store. If you want to install an app that isn't available in the Microsoft™ Store, you'll need to switch out of S mode.

Note: Switching out of S mode is one-way. If you make the switch, you won't be able to go back to Windows™ 10 in S mode. You may switch back only if a software upgrade is made available. We recommend that you back up all your files onto an external hard drive before switching OS. Switching out of S mode is free of charge.

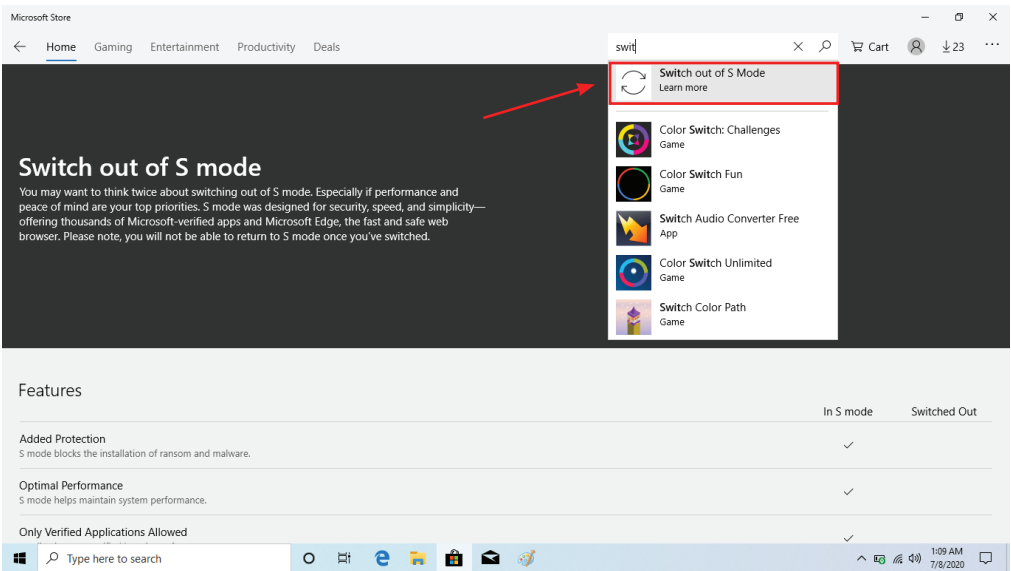

### To switch out of S Mode, follow these steps:

1. Make sure you are logged into the Microsoft™ Store.

## Windows™ 10 in S Mode (Continued)

2. In the Microsoft™ Store, search for “Switch out of S Mode.”

3. Click on the Get button. Once the software has downloaded, click on the Install button and follow the onscreen instructions to complete the setup.
