# Manual

**Works with Apple Find My**

The Apple® Find My® network provides an easy, secure way to locate compatible personal items using the Find My app on your iPhone®, iPad®, Mac®, or the Find Items app on Apple Watch®.

To use the Apple Find My app to locate this item, the latest version of iOS®, iPadOS®, or macOS® is recommended. The Find Items app on Apple Watch requires the latest version of watchOS®.

Use of the Works with Apple badge means that a product has been designed to work specifically with the technology identified in the badge and has been certified by the product manufacturer to meet Apple Find My network product specifications and requirements. Apple is not responsible for the operation of this device or use of this product or its compliance with safety and regulatory standards.

Ver： 2023.03

## Preface

If your missing device can't connect to the internet or has little to no battery life, the Find My app can still help you track it down using the Find My network-hundreds of millions of iPhone, iPad, and Mac devices around the world. Nearby devices securely send the location of your missing device to iCloud, then you can see where it is in the Find My app. It's all anonymous and encrypted to protect everyone's privacy.
Just like every Apple product, Find My is designed to put you in control of your data. Location information is only sent to Apple when you actively locate your device, mark it as lost, or enable Send Last Location. Data is encrypted on Apple's servers and kept for no more than 24 hours. And when the Find My network is used, everyone's information is kept private-even from Apple.
Let's start the iTracker.

## Getting Started

**Power on / Off:**
• To power on, press your device's function button once to turn on, it should have indication ringtones indicating it is powered on.

### Learn More
• This item can be located by its owner using the Find my app. For more info,Follow the instructions below.
• Locate the button on the front of the device.
• Press the button twice. You will hear a confirmation sound.
• Tap "Continue On Website" for more information including any Lost Mode message from the owner.

### How to Disable
• Locate the button on the front of the device.
• Press and hold the button for three seconds until two beeps are heard.This will stop sharing the location of this item.

### Factory Rest
• Press the button 4 times rapidly and then hold it a fifth time until you hear a ringing chime.
• A reset operation is required to enable the device to enter the pairing state again (synchronization of Findmy also requires simultaneous unbinding) and rebind the new Apple ID account.

## How can I prevent my device from being used for malicious tracking?
When someone else's device mixes with your belongings, and tracks it over a period of time, you will be reminded in below two ways:
• If you have an iPhone, iPad, or iPod touch etc Apple device, you will get alerts on your Apple device. This feature is available on iOS or iPadOS 14.5 version or above.
• If someone else's device finds its way into your stuff, your iPhone will notice it's traveling with you and send you an alert. After a while, if you still haven't found it, the AirTag will start playing a sound to let you know it's there.

### Important tips:
• When pairing a device with Find My app, the phone will link to the Apple server. Pairing may fail because of network problems. The following action is recommended:
A. Change the phone's network, such as switching between WiFi and mobile. The first pairing may takes a long time, please wait patiently.
B. Reset your item.
C.Repair with "Find My" APP.
• When "Lost Mode" is enable, DO NOT REMOVE ITEM in the APP. Your Item Locator will be locked and cannot be paired to a new device.
