

Declaration of Product Modifications

October 12, 2023

This is to request a Class II permissive change for FCC ID: **2AW3T-6260-002**, originally granted on 06/05/2023.

The major change filed under this application is:

● Enable CDD and Beamforming mode for 2.4GHz and 5GHz Band1~4 by software(SW version: v0.1630_Perf), in this case, conducted power and RSE are performed to demonstrate compliance. Formal release firmware is limited to adjust RF parameters. It will not affect the software security of 594280 D02.

Except for the above differences, the hardware design is identical with the original grant.

Should you have any enquires or comments, please have my best attention.

Sincerely,

A handwritten signature in black ink that reads "Dayna Wittman". The signature is fluid and cursive.

Name: Dayna Wittman

Title: Compliance Team Lead

Company name: Toshiba Global Commerce Solutions, Inc.
