

<p style="text-align: center;"><b>Solder Board-Component View 17</b></p>	 A photograph of a green PCB component with a USB connector and various electronic components. The component is placed on a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component positioned between the 10mm and 60mm marks. The component has a USB connector on the left side and several small components on the right side, including a chip labeled 'DS12-USB-2' and a component labeled 'USB_PWRK'. The component is oriented vertically on the ruler.
<p style="text-align: center;"><b>Solder Board-Component View 18</b></p>	 A photograph of a green PCB component, similar to the one in View 17, but without the USB connector and other components. The component is placed on a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component positioned between the 10mm and 60mm marks. The component has several circular holes and small components on its surface. The component is oriented vertically on the ruler.

<p style="text-align: center;"><b>Solder Board-Component View 19</b></p>	 A photograph showing a small electronic component, likely a connector or interface board, mounted on a blue fabric surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 10 to 20 mm. The component has a silver-colored metal housing on one side and a green printed circuit board (PCB) on the other, with several pins or solder points visible.
<p style="text-align: center;"><b>Solder Board-Component View 20</b></p>	 A photograph showing the same electronic component from a different perspective, highlighting the green PCB side. The component is placed on a blue fabric surface next to a black ruler with white markings. The ruler indicates the component's width is approximately 10 mm. The PCB has several silver-colored solder points and a small blue component on top.
