## EzSOS Emergency Wristband

Model: ezSOS v1.0

### Technical specification

1. Input voltage: 3-5.5V
2. Battery CR1632(Battery life: 1 to 2 years)

### Instructions

1. Press the bell key on the wristband, the phone will alarm, then you can find the phone
2. Press the SOS button on the wristband, the phone will alarm first, send SOS message and call the SOS number, in order to ensure that the SOS procedure can be performed, make sure that the SOS menu is on and the SOS numbers are set.

### Note

1. The range of the wristband to the phone depends on the surrounding (line of the land, thickness of walls, electromagnetic interference, etc.) and may be significantly limited.
2. Because of radio interference, it can happen that the wristband will not work in the relevant time.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate

radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement
