Installation Steps

① Before installation, prepare one cross-point screwdriver.

screwdriver   screw   mortise lock   front panel   back panel
② Modify the mortise lock backset based on the distance from the hole centerline to the door edge.
Common backset standard is 70mm and 60mm, adjust it based on actual requirement.

Default mortise lock backset is 60mm. If need to adjust, please follow the right steps to adjust:

Pull out the circled part to extend 70mm backset

③ Thread the mortise wire through the top hole and insert the mortise into the door, Then use 2 pcs screws to fix the mortise(As shown).
④ Insert suitable threaded sleeves and square rods to the corresponding position of the front panel (As shown).
⑤ Thread the front panel wire through the hole.The front panel square rod exits through the square rod hole of the mortise lock.(As shown).
⑥ Fasten the front panel and back cover plate with 3 pcs screws(As shown).

⑦ The back panel shall be connected with the wire of the front panel and the wire of the mortise lock(As shown).
⑧ Fasten the front panel and back panel with 2 pcs screws(As shown).

⑨ At last put into batteries and cover them.Move the anti-peep button right side to the unlocking position(as shown): Please check whether lifting handle can lock the door properly or pressing handle can open the door normally; Please check whether the unlocking ways of password,fingerprint,card and mechanical key can work properly.
Change direction of front handle
1.Remove screw by screwdriver(As shown).
2.a.Rotate upward the front handle to reverse direction (As shown).
b.Tighten the screw. Please check whether the handle is used properly.

Switch Screw
Change the direction of back handle
1.Remove screw by screwdriver(As shown).
2.a.Rotate the back handle to reverse direction(As shown).
b.Install the back handle on back panel and tighten the screw.At last,please check whether the handle is used properly.

Attention

1. Operating the lock requires a special environment. Please use it in specified field technology ranges.The long time overload and exceeding usage will reduce the life span. Please keep your finger clear and prevent this product from long time in the sunshine when using it.
2. After a period of time there will be dirt on the fingerprint reader and this may affect normal use. Please use soft cotton to clear the fingerprint reader. The fingerprint head and screen are fragile glass materials, please do not hit or touch with any hard object.
3. If the lock voltage is insufficient when opening the door, it will prompt with alarm sound and the screen showing low voltage. Please change the battery in time.
4.Please do not use mixed old and new battery. If you do not change the battery in time, the system will be out of power and stop running. If the battery is dead, power the lock with a 5V Type-C charging bank.
5. Please choose professional workers to install the door lock and follow our installation standard. Please do not disassemble this lock personally. Please take care of relevant label to avoid unnecessary trouble for warranty.
6. Please register the administrator fingerprint and keep the mechanical keys after the lock is installed well. When the fingerprint and password and other methods can't open the door, you can open the door with the mechanical key.
7.The lock handle is the necessary auxiliary tool to open the door.Please do not hang any heavy object on the handle.
