Magnetic Pad Positioning Sheet

Magnetic Pad

C to c cable 1M

20W PD Car charger

PRODUCT PARAMETERS

NAME

LISEN MAGNETIC WIRELESS CAR CHARGER

MODELL

E710

MATERIAL

ABS+PC/GLASS

MAXIMUM EXTERNAL SIZE

100.37MM\*61.67MM\*61.67MM

PRODUCT WEIGHT

132.6G

HOOK EXTENDABLE LENGTH

20MM

COMPATIBLE VENT BLADE WIDTH

11MM-28MM

OUTPUT

5W/7.5W/10W/15W

ABOUT THE MECHANISM FOR USING REFRIGERATION:

1. After plugging into DC power, the LED remains on for 10S and then goes out.

2. When Wireless Charger has devices connected to it, the LED shows the status of the seven-colour mode.

3. When the surface temperature is below 17 C for 3 minutes, the LED turns off. When the surface temperature is above 22 C for 3 minutes, the LED turns back on.

COMPATIBILITY

1.Headphones: AirPods Pro (With magnet); AirPods 3rd Generation (Bare)

2.iPhone 12/13 series Bare/With-original Magsafe Case/The Third Party without Magsafe case need to use the Magnetic Pad. (Refer to the following tutorial)

3.Phone with wireless charging but not supports Magsafe, which needs to use the Magnetic Pad. (Refer to the following tutorial)

4.Phone without wireless charging needs to use the Magnetic Pad (Only the car mount function, no wireless charging function)

INSTRUCTIONS FOR USE

1. Loosen the fixing nut;

2. Put the rotating ball into the bolt;

3. Tighten the fixing nut;

4. Turn the hook clip adjustment knob, adjust the hook clip to the biggest length;

正面印刷

5. Hook the hook clip into the blade, turn the hook clip adjustment knob to lock the blade tightly;

6. To remove the holder, loosen the adjusting knob of the hook clip, and then remove the holder from the blade.

The blade should be kept horizontal and perpendicular to the surface of the air vent

MAGNETIC PAD USE TUTORIAL

1. If you use a non-magsafe phone case, you need to stick the magnetic sheet, the operation method is as follows:

2. Align the magnetic sheet locator up and down and place it on the back of the phone/phone case; ATear off the protective film of the magnetic sheet and stick it on the center of the magnetic sheet locator;

3. The surface of the phone case is uneven, and the liquid silicone case, oil spray case, fabric leather case are not applicable to this Magnetic Pad

PRECAUTIONS

1. The tail fan blade is for the air intake and outlet, please don't block

2.Please use QC3.0 or PD18W car charger, when the input voltage is only 5V, the semiconductor cooling off, the fan off, there is only the wireless charging function; when the input voltage is 9V or 12V will open the semiconductor cooling and fan open.

3. Metal accessories (metal pad, popsocket) or credit cards will interfere with charging. The cases containing metal, such as Pitaka, Evutec and Spigen QNMP, will trigger foreign object detection and interrupt charging.

4. Using the phone for GPS or listening to music while charging will significantly affect the charging speed. When using GPS applications, the power consumption may be higher than the charging speed.

5. It is normal for the wireless charger to have slight heating during use. If you encounter serious heating, please suspend use and contact our after-sales email.

AFTER SALE SERVICE

Lisen always dedicates to bring great shopping experience for each customer. Please feel free to contact us if you have any questions.
