 <p>infly Grace maglev sonic electric toothbrush manual</p> <p>iF infly</p>	<p>Thanking</p> <p>Thank you for choosing infly electric toothbrush. Please refer to this instruction before starting to use and check whether the packing accessories is complete and follow the instructions to complete the production, after the product is assembled, it will be used.</p>  <p>Infly Official website Infly Official Vlog</p>	<p>Packing Accessories</p>  <p>Host Toothbrush head Manual Charging base</p>	<p>Assemble electric toothbrush</p>  <p>Assembly Schematic</p> <p>Take out the toothbrush host and brush head, and install the brush head on the main machine. Please note that the direction of the brush head buckle should correspond to the host during installation.</p>	<p>Knowing the toothbrush</p>  <p>Toothbrush head Toothbrush host Switch button standard mode soft mode cleaning mode cleaning+ mode Power light Charging base</p>	<p>Starting use</p>  <p>Press the switch button and the toothbrush will start up. Press the button continuously to change the brushing mode.</p>	<p>Travel Mode</p>  <p>When the machine is off, long-press the switch button for about 5 seconds. All the indicators blink 3 times to enter the travel mode, and the switch button is locked. Press the button again for about 5 seconds and all the indicators blink 3 times to unlock and return to normal mode.</p>
<p>Charging</p>  <p>After starting, if the battery indicator flashes, it needs to be charged. Please wipe the toothbrush host and base clean before charging, and keep it dry. The base is connected to the power supply, and the main toothbrush unit can be charged by plugging it into the base. Indicator light flashes during charging and stays on when fully charged.</p>	<p>FAQ</p> <ol style="list-style-type: none"> How to do if the machine cannot be turned on? Check whether the battery is sufficient, if the battery is insufficient, you need to charge it first; if it is fully charged, but still cannot be turned on, it may be into travel mode, please refer to the travel mode instructions to unlock. Why is the vibration reduced after a period of use? With the increase of the use time, the amount of electricity will decrease, which will lead to weak vibration, just charge the toothbrush. 	<p>Maintenance</p> <ol style="list-style-type: none"> Wash the brush head and bristles after use and let them dry naturally. Please do not pull on the bristles, otherwise it will be easily deformed and shedding. Do not immerse the body of the toothbrush in water. Do not use water or acidic cleaning solution higher than 40°C for cleaning. Please clean the stains on the charging stand with a soft cloth. Before cleaning the charging stand, be sure to unplug the power plug from the socket to prevent electric shock. Wipe the plug with a dry cloth to avoid short circuit. Recommended to replace the brush head every three months. When using for the first time, if you have any remaining power, please use up and recharge. 6 months without use, please charge 3-5 hours before use. During use, if the charging indicator flashes for a few seconds and then stops, it means that the power is insufficient. Place the main unit of the toothbrush on the charging stand and confirm that the charger is connected to the power source. The indicator light flashes during charging and stays on for a long time. If it has not been charged for a long time, it will be normal for the indicator light will wait 6-10 minutes before recharging. 	<p>After-sale policy:</p> <p>Thank you for choosing infly products!
