

Statement of compliant according SAR Test Exclusion

Herewith RF-KIT confirms that according KDB 447498 D01 General RF Exposure Guidance v06", Appendix A, the RF2K-S product is compliant and as such achieved SAR test Exclusion.

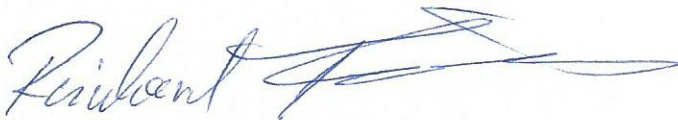

Reason:

The used Raspberry Pi and his WiFi antenna is installed inside the RF2K-S and surrounded by aluminum housing.

The WiFi antenna is located 4,5cm inside the RF2K-S.

According KDB 447498 D01 General RF Exposure Guidance v06", Appendix A, the Raspberry Pi4B max. power of 28mW stays below the SAR Test Exclusion limit of max. 56mW
