Object: Class II Permissive change request for module IM980A

FCC ID: 2AWAL409810

This letter serves as an official request for FCC approval of a Class II Permissive Change for the module IM980A.

The reason for the Class II Permissive Change is the use of three different antennas that differ from the original one, a PIFA antenna on pcb. The new antennas are:

- an SMD antenna p/n PRO-OB-471
- a quarter wavelength monopole antenna
- a custom wire antenna that fits the final product's shape.

The laboratory tests are necessary in order to demonstrate that the module remains compliance with FCC rules.

Sincerely,

Client's signature:
